## Release Update – April 25, 2019

Firmware Version: 1.0.1061.62

### What's new

- None

### Improvements

- None

### Bug Fixes

- Randomly touch failed randomly when panel boots up.
- Screen share app
  - After exiting from the app and immediately selecting 'home' icon from side bar menu, the home screen turned black.
  - App randomly closed while doing Miracast sharing.
  - Switch to other app failed when launching screen share app.
  - Randomly find device failed after screen share disconnecting.
- ES file manager application
  - Can't log in Google drive from single sign-on.
  - System prompts for updating to new ES file manager version.

### Known Issues:

- Airplay will not support Netflix based on Netflix's announcement.
  - Netflix announced "Airplay is no longer supported for use with Netflix due to technical limitations."
- There are many issues in Zoom app, we have decided to temporarily remove the app from preload app list. We will preload the app again when those issues are fixed by Zoom.
- Can't log in One Drive in ES file manager
  - We are working on the fix for next release.
- Input source randomly displays "No Signal" string when HDMI port is plugged in.
  - We are working on the fix it.
  - Workaround: Re-plug in HDMI cable.
- Can't input string from browser search.
  - We are working on the fix it.
  - Workaround: Tap the search bar again.
- Randomly can't play YouTube video via Airplay device.

- We are working on the fix for next release.
- Screen share app does not support YouTube's cast function.
- Screen share does not support Apple's app-specific protocols such as Keynote.
  - This is by design of screen share app.
- When casting device and the panel are not in the same time zone, YouTube video casting will fail.
  - This is the limitation on your devices which checks the time zone in server with Google before playing YouTube video.
  - The workaround is to set your casting device and the panel to the same time zone.
- Chromecast randomly drops due to certification time zone realignment.
  - This is by design of Chromecast certification. The workaround is to reconnect your device to screen share.
- No support for Dolby stereo.
  - This is the limitation in our decoder which doesn't support Dolby sound.
- Android Printing does not work in the current version.
  - This will be fixed in future release.
- Gallery media player app does not support MP4 file.
  - This is the limitation in Gallery app.
  - The workaround is to use ES media player to play MP4 video.
- Voice search does not work in Search app.
  - This is the limitation in Search app.
