Release note

Product:

Dual Lens Tracking Camera: TR535/TR535N

FW version	V0.0.0000.18
Release date	2024/8/5
New Feature	None. (this is 1st FW release of TR535/ TR535N)
Improvement	1. ZONE mode AI tracking will be more accurate if the AI tracking target crosses the zone boundary, causing the camera to move to that zone. This is an improvement over single lens tracking cameras, where if someone crosses the zone boundary, the camera follows the target to the new zone. In the TR535, the AI camera only follows the AI target into the new zone.

Known issue	1. We recommend using the Chrome browser for configuring webpages.
	
	2. HTTPS: Enable HTTPS to establish a secure connection between the browser and the camera. To enable HTTPS, please follow the steps below.
	  A. Obtain an SSL certificate in base-64 encoding format for encryption and decryption, and a private key in PKCS#8 format (must be unencrypted).
	  B. Convert the required certificate content into PEM format. The SSL certificate uploaded to the camera must be in PEM format.
	  C. In the HTTPS settings field, select "On", then click "Choose File" to select the certificate file, and then click "Upload".
	
	3. The TR535 is not compatible with Mac O.S 11
