

MD120UI Release note

Product : MD120UI

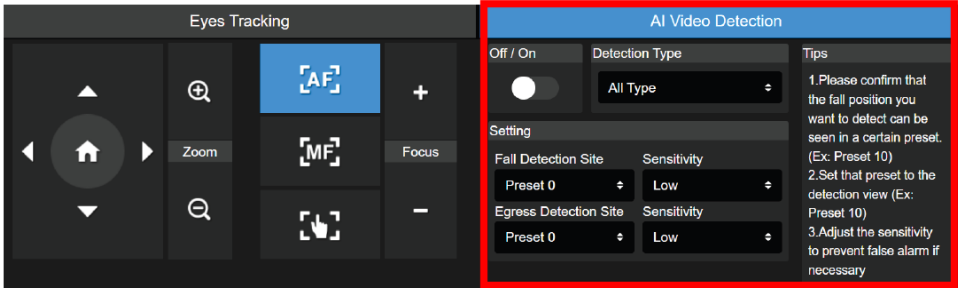

Tips

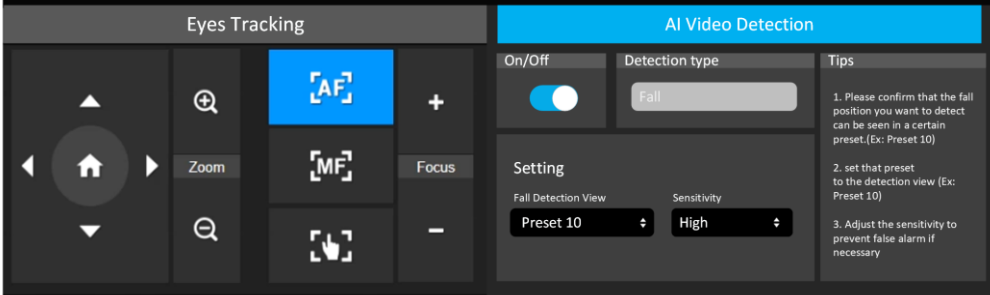

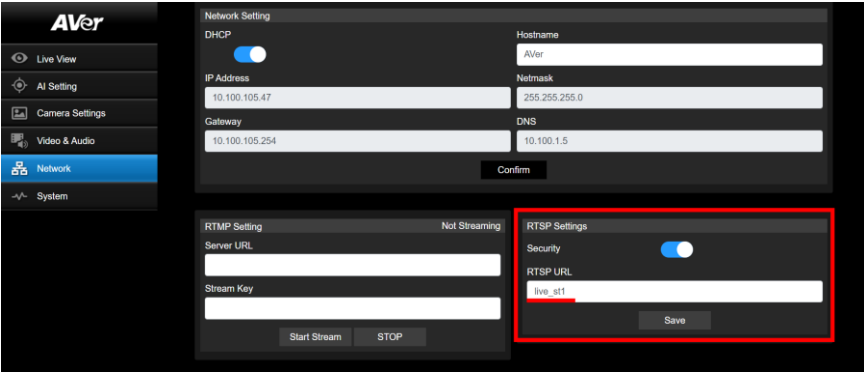

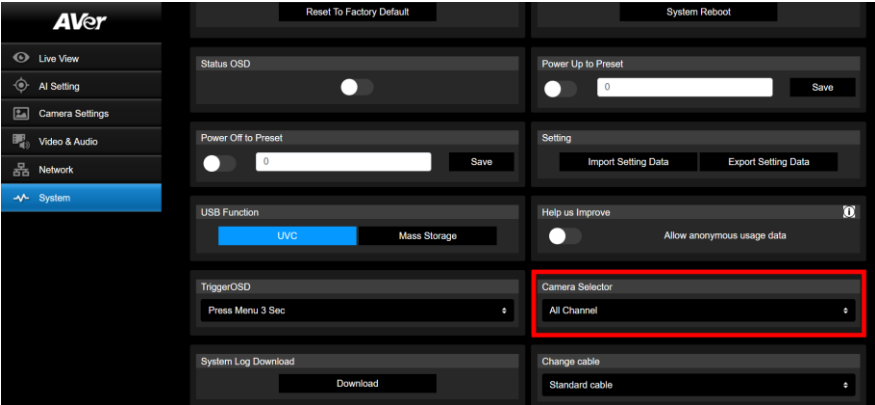

1. You need to press and hold [Menu] button for 3 sec on the RC to trigger OSD
2. The built-in microphone is suitable for unidirectional full sound pickup for environmental monitoring and does not support NR noise reduction.

FW version	1.1.1030.0
Release date	2026/9/15
Checksum	5ee61764ffa8ea07681c24d19fdefc26 (MD5)
New feature	1. Support NDI Users can use Theme Mode option to enable NDI  2. Support Mosaic on body and more related feature User now can select Mosaic on face or body. When mosaic is enabled, users can choose whether to add a privacy black screen to the output of the un-mosaic screen (enabled by default) 3. Support Mosaic on NET or USB or HDMI output In 4K resolution, the mosaic will be applied to all output(NET and USB and HDMI) 4. Support export syslog from EM
Improvement	1. Fixed an issue where IR Night Vision would not automatically switch in certain situations. 2. Corrected the flickering effect of zooming in under certain lighting conditions. 3. Add FW verification mechanism to avoid update errors caused by incomplete packet processing. 4. Improve the efficiency of mosaics and make them fit the face more closely.(The maximum number of faces that can be pixelated simultaneously in a field of view (FOV) is 10.)
Known issue	N/A

FW version	1.1.1023.0
Release date	2025/11/13
Checksum	fa8ec003f6fd2a94572c91f8d59bc8ad (MD5)
New feature	1. Support DIS (Digital image stability) DIS can reduces camera shake, but result in lower FPS(ie: 4K/60 will be reduced to 4K/30), narrower FOV, and occasional image jitter or distortion in certain scenarios.

	2. Support new remote control (white one) with more features ie. focus/flip/mirror/IR night vision control 3. HDMI output now can contain the sound been pickup by microphone on MD120UI Select whether to include microphone audio in the HDMI output , can be used for live streaming from the operating room and transmitting sound to remote locations.
Improvement	5. Fixed the issue where the Zoom Speed would increase when using the remote control 6. Add [color mode] option for some DVI monitors 7. Improve the stability of firmware updates
Known issue	- Changing the streaming resolution during RTMP streaming may cause issues.

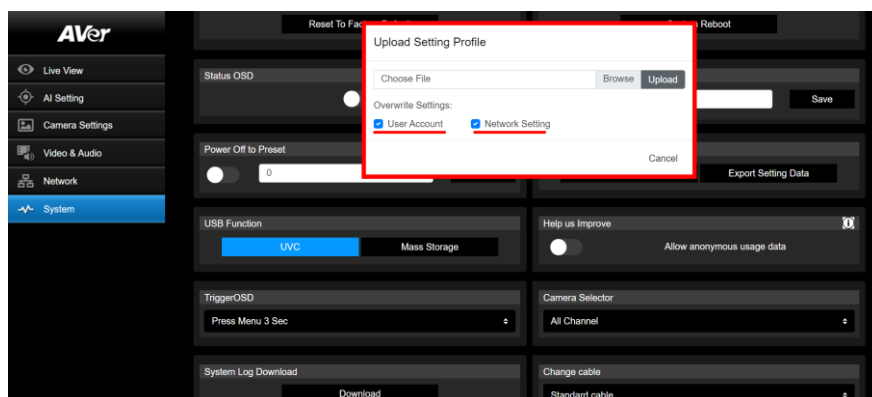

FW version	1.1.1013.0
Release date	2024/6/28
Checksum	387f6ff034319788b4223d5f85b8def9 (MD5)
New feature	8. Add Egress Detection feature. The setting method is the same as Fall Detection on WEB UI and able to send alarm events. AI Video Detection  9. Passwords need to be more complex to comply with cybersecurity trends (Product Security and Telecommunications Infrastructure Act , PSTI) Change the username and password before logging in to the web interface. ● Username: Use 1-32 characters. ● Password: Use 8-32 characters and a combination of uppercase letters, lowercase letters, numbers, and symbols (%+=, - _ ^/ @ . ~). The password cannot be the same as the username. ** when an existing customer has set Account:1 and Pass:1(which not fit the new rule) , the account password will remain 1,1 after updating the FW. But after set the camera to default, it will be required to comply with the new password rule.
Improvement	1. Fix the issue that may cause camera offline temporary in some use case 2. Change the IR Night Vision setting to [Auto] and Sensitivity [Middle] 3. Some improvement to improve stability
Known issue	-

FW version	1.1.1012.0
Release date	2023/12/25
Checksum	d812115a909a3c0d651755bfd745c1ac
New feature	10. Support AI Fall Detection WebUI >> AI >> AI Setting >> AI Video Detection when fall been detected in the FOV , MD120UI would trigger an event via network , this event can be received by AVer ViewCare or third-party SW which supported.  11. Support Custom RTSP Settings WebUI >> Network >> RTSP Settings RTSP Sample : rtsp://account:passwd@device_ip/rtsp_url  12. Support PELCO-D & PELCO-P Camera Control Protocol (RS-232) 13. Now you can set the camera RC channel on WEB UI WebUI >> System >> Camera Selector  14. Support mosaic (pixelated) on face in RTSP for Privacy The camera can now auto detect "Faces" in the view and mosaic on RTSP WebUI >> Video & Audio >> Mosaic on Stream >> Full face **all ports would with Mosaic when enable and select 4K video streaming

15. Support more options to overwrite the setting when Importing Setting Data

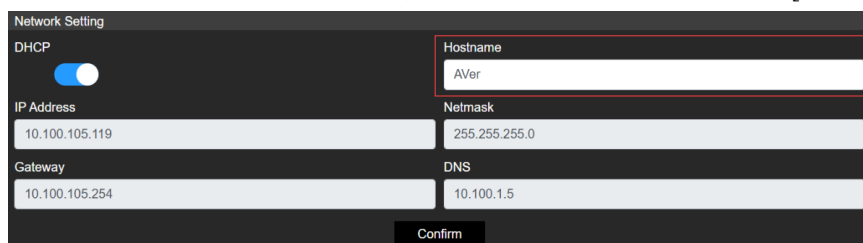

WebUI >> System >> Setting >> Import Setting Data

Check the [User Account] , [Network Setting] if you want to overwrite

16. Support Hostname on MSFT DNS server for better device management

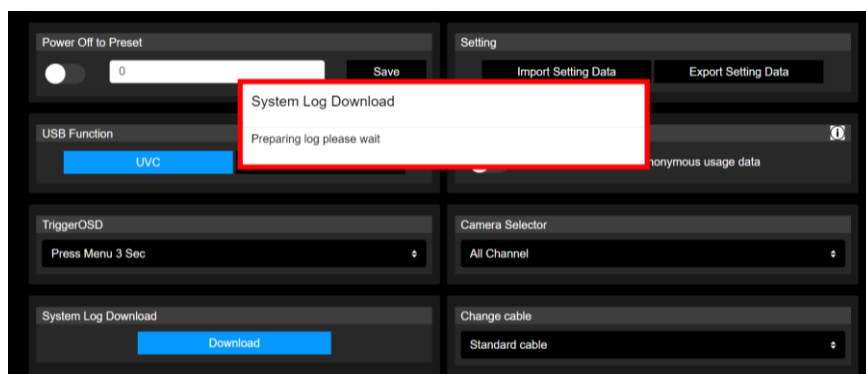

web UI >>> Network >>> Hostname, set the camera hostname and click [Confirm]

Improvement

1. Remove BETA function(AI Alert Detection)
2. Improve AI Tracking stability and accuracy
3. Improve AF(Auto Focus) in IR Night Vision
4. Fixed UI issue on some browser setting
5. Optimize user flow when download log

A prompt window will pop up when the UI is temporarily frozen due to downloading logs.

Known issue

-

Release note

Product : MD120UI

****You need to press and hold [Menu] button on the RC to trigger OSD**

****AI Alert Detection is a BETA Function**

FW version	1.1.1008.0
Release date	2023/9/1
New feature	1. Camera ops change to improve usability. Camera would be set to AF after enable Eyes Tracking or AI function
Improvement	4. Improve AI Tracking and AF stability and accuracy. 5. Improve AF in IR Night Mode. 6. Improve system stability in long run.
Known issue	1. Under certain browser settings, the proportions of web UI might be distorted (does not affect operation.)
