

# MT300/MT300N

## Matrix Tracking Box

— User Manual —

## **Federal Communication Commission**

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radiofrequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This Class A digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

## **PSTI Statement of Compliance**

Please refer to the following website: <https://www.aver.com/product-security-advisory>

## **Warning**

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

## **Caution**

Risk of Explosion if Battery is replaced by an Incorrect Type. Dispose of Used Batteries According to the Instructions.

## **COPYRIGHT**

# Installation

## Cable Fixing Plate Installation

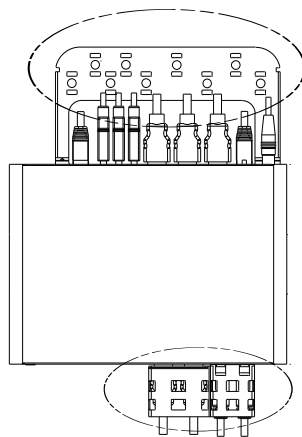

1. Secure the cable fixing plates to the tracking box with 5 flat hat 3.0 x 5 mm screws in the package.

2. Plug in cables.

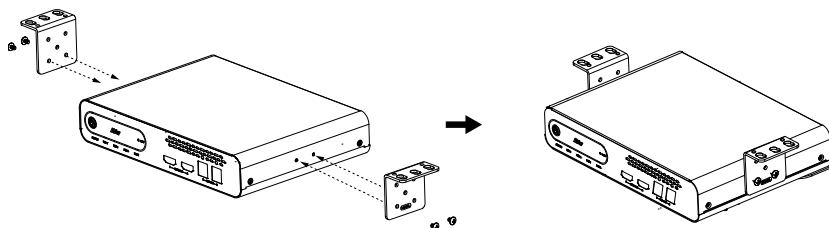

3. Use 13 cable ties in the package to secure the cables and cable fixing plates.

## Desk Mount Installation

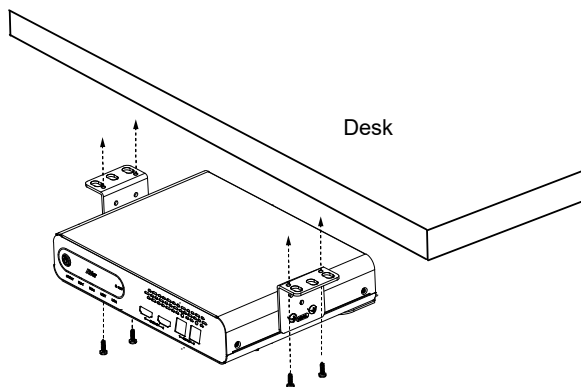

1. Secure the mount brackets on the tracking box.

Screw: 4 truss head screws, 3.0 x 5 mm

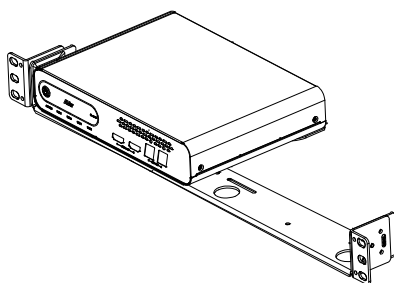

2. Install the mount brackets and the tracking box under the desk.

Screw: 4 screws, M3 x 10 mm

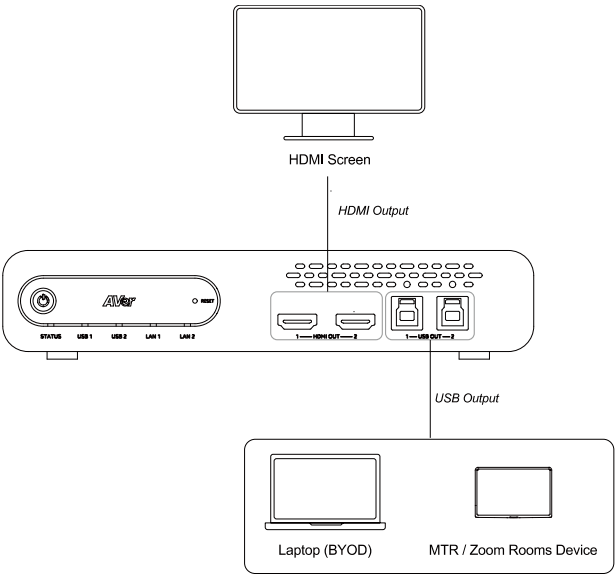

## Server Rack Mount (Optional Accessories)

For details on optional accessories, consult your local dealer.

# Get Started

## Power Your Device

The device automatically powers on when connected to power. No need to press the **power** button . Press and hold for 5 seconds to enter Standby Mode. Press once to wake up.

## Reset Your Device

Insert a paper clip into the reset hole, push in and hold for 5 seconds to reset to the device to factory default settings.

# Access the Web Interface

To access the web interface of the Matrix Tracking Box, you can use any of the following software to find its IP address:

- AVer Device Utility
- AVer Enterprise Management

**Note:**

- The default network setting is as follows:  
PoE+ port: DHCP  
Ethernet port: Static IP 192.168.168.168
- The default username and password is **admin/admin**.

### To access the web interface:

1. Download AVer Device Utility from AVer Download Center (<https://www.aver.com/download-center>) and launch the software.
2. Click **Search** to see available devices on the same local area network (LAN).

**Note:**

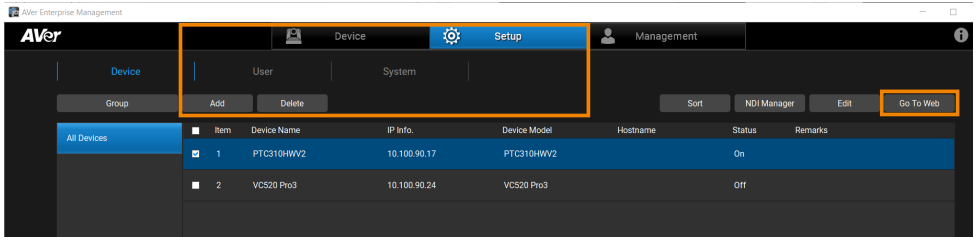

- Make sure your device is connected to the internet.
- AVer Device Utility and your device must be on the same LAN.

3. Double-click on your device's IP address in the **IPv4 Address** column to open the web interface in your browser.

#### To change your network to DHCP or static IP:

1. Select the checkbox of your device.
2. Enter the username and password in the **Login** field.
3. Select **DHCP** or **Static IP**, then enter your network settings if applicable in the **Settings** section.
4. Click **Apply**.

## AVer Enterprise Management

**Note:** AVer Enterprise Management default username and password is **admin/admin**.

#### To access the web interface:

1. Download AVer Enterprise Management from AVer Download Center (<https://www.aver.com/download-center>) and launch the software.
2. Log in with the default username and password **admin/admin**.
3. Go to **Setup > Add**, then click **Auto Search** to see available devices on the same local area network (LAN).
4. Click to select your device, enter the username and password, then click **Save** to add the device to the device list.
5. Select the checkbox of your device, then click **Go to Web** button to open the web interface in your browser.

## Change the Username and Password

When you log in for the first time, you'll be prompted to change the username and password. The username and password cannot be the same.

- Username: Use 1-32 characters.
- Password: Use 8-32 characters and a combination of uppercase letters, lowercase letters, and, numbers. Symbols (!\$%&'()\*+,-./<=>?@[]^\_{}~) are optional.

# Compare Modes

The MT300 offers three built-in modes—**Live Mode**, **Manual Mode**, and **Auto Mode**—to help you present video feeds in a single, composited stream.

- **Live Mode** provides live camera views with PTZ control and presets, but doesn't save settings.
- **Manual Mode** supports camera presets and human tracking, with settings saved to profiles.
- **Auto Mode** uses voice tracking, either through pairing the camera with a third-party microphone or by receiving X, Y, Z coordinate data to frame the active speaker in real time.

Feature	Live Mode	Manual Mode	Auto Mode - Channel	Auto Mode - Active Position
Live view camera count	4	4	4	–
Profiles	–	36	36	36
Presets	–	256	256	–
AVer camera + microphone groups	–	–	25	–
Human Tracking	–	✓	✓	–
3 <sup>rd</sup> -party microphone integration	–	–	✓	✓
X, Y, Z coordinates input	–	–	–	✓

## Understand Human Tracking

Human Tracking includes Presenter, Zone, Segment (supported models), and Hybrid Modes.

To enable human tracking with Manual Mode and Auto Mode (Channel), make sure you have configured required tracking modes on the camera web interface. Please refer to <[Supported AVer Devices](#)> for supported AVer devices and your camera's user manual for tracking mode settings.

Example: Auto Mode (Channel) with Presenter Mode

Channel 1 detects voice

Camera moves to preset 1

Presenter Mode is turned on

# Supported AVer Devices

**Note:** When using non-AVer cameras, only Live Mode and Manual Mode are available. Auto Mode (voice tracking) and camera control are not supported. The device is optimized for AVer equipment. Performance with third-party cameras is not guaranteed.

# Supported Microphones

**Important Note on Voice Tracking Installation**

When installing voice tracking systems, consider the environment, materials, and distances to ensure optimal performance. Assess the room size, layout, and acoustics, as these factors impact accuracy. Different surfaces affect sound reflection and absorption, influencing effectiveness. Measure and maintain appropriate distances between devices and the coverage area for clear tracking. To achieve the best experience, connect with an AVer technical expert who can tailor the installation to your specific needs.

**Note:**

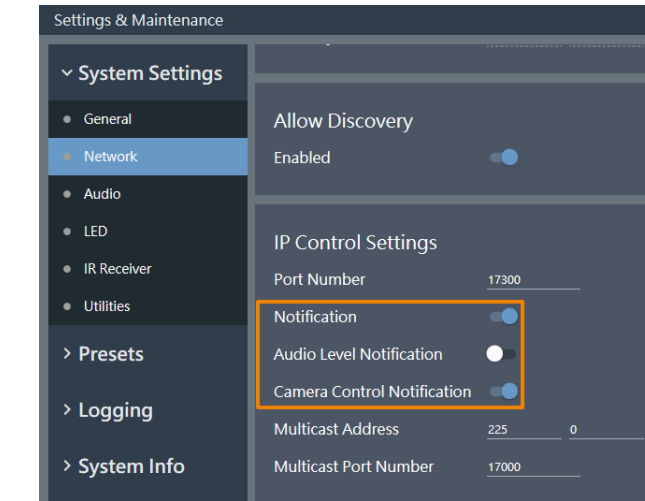

- Third-party microphone systems may require setup in their manufacture software.
- Make sure you have turned on **Multicast** on the router before setting up your microphone.

## Audio-Technica

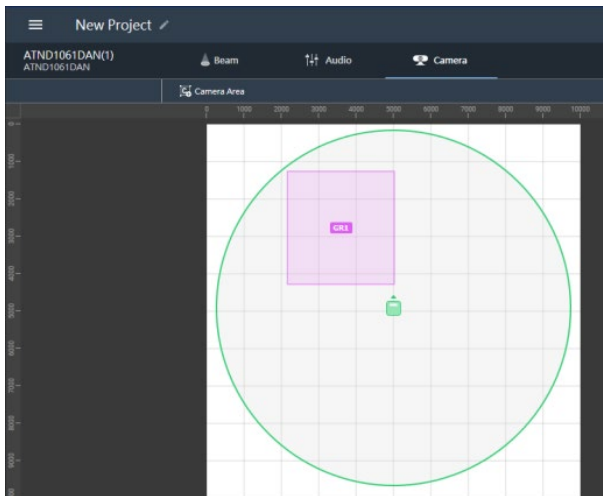

- ATND1061DAN, ATND1061LK
- ATUC-50
- ATUC-IR

### To set up ATND1061 Beamforming Ceiling Array Microphone:

1. Open Digital Microphone Manager. Go to **Settings & Maintenance**  > **System Settings** > **Network** > **IP Control Settings**.
2. Turn on **Notification** and **Camera Control Notification**.

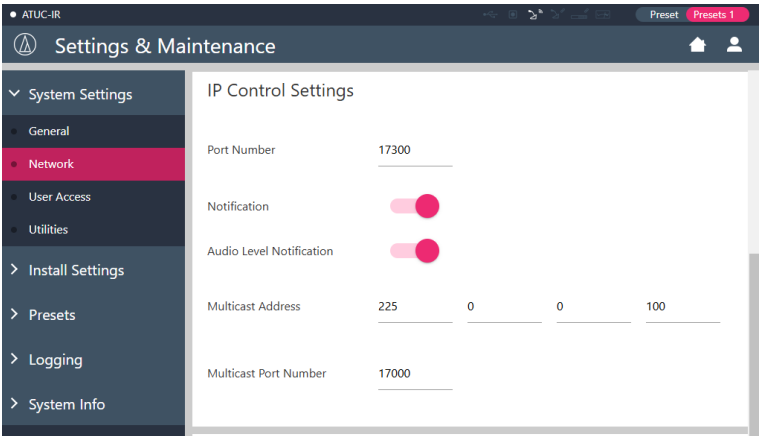

3. Select a microphone in the main area.
4. Go to **Camera > Camera Area**. Add a Camera Area by dragging it within the microphone pickup area. Each Camera Area group corresponds to MT300 channel 1-8.

**To set up ATUC-IRCU infrared control unit:**

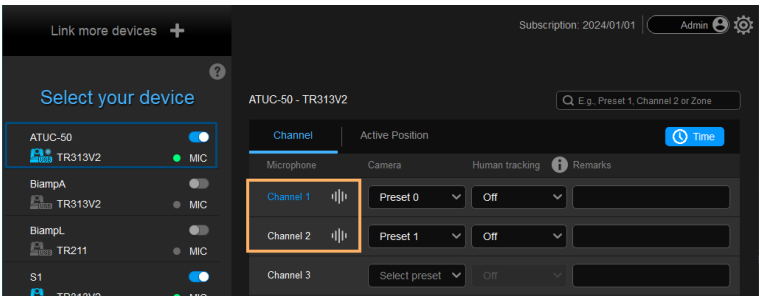

1. On the ATUC-IRCU Web Remote interface, go to **Settings & Maintenance > System Settings > Network > IP Control Settings**.
2. Turn on **Notification**.

**Note:** If a powered-off ATUC-IRDU appears to be sending audio signal in MT300, turn on **Audio Level Notification** to resolve the issue.

**Pairing ATUC-50 with AVer camera presets for voice tracking :**

- Each ATUC-50DU or ATUC-IRDU discussion unit corresponds to an MT300 channel.
- A discussion unit whose talk button is pressed first takes priority over others until it is mute. For example, Channel 1 (pressed first) takes priority over Channel 2 whose talk button is also pressed.

# Biamp

Tesira Digital Signal Processor

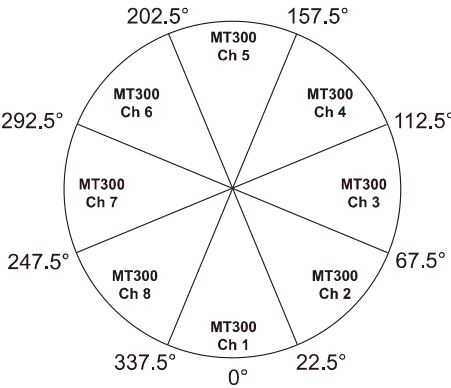

Parlé Ceiling Microphones (requires Parlé product revision A or B)

## Hardware and Channels Overview

Tesira Digital Signal Processor	Tesira Forte X, Tesira Forte Rackmount, Tesira Server IO, Tesira Server.
Parlé TCM-X	Plenum network box + one ceiling-mount microphone array
Parlé TCM-XA	Plenum network box with built-in amplifier+ one ceiling-mount microphone array
Parlé TCM-XEX	One expansion ceiling-mount microphone array

One ceiling microphone arrays is permitted for network box (one TCM-X or TCM-XA with TCM-XEX).

Each ceiling microphone array has 8 channels. MT300 divides the microphones' horizontal angles into 8 equal parts, which correspond to MT300 Channel 1 - 8.

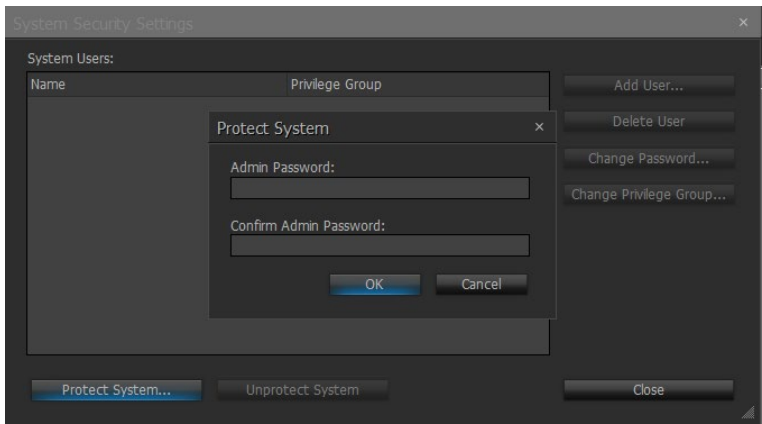

Microphone	Channel Start/End
AVerParleMic1	1-8 (ceiling mic 1) 9-16 (ceiling mic 2)
AVerParleMic2	17-24 (ceiling mic 1) 25-32 (ceiling mic 2)
AVerParleMic3	33-40 (ceiling mic 1) 41-48 (ceiling mic 2)
AVerParleMic4	49-56 (ceiling mic 1) 57-64 (ceiling mic 2)
AVerParleMic5	65-72 (ceiling mic 1) 73-80 (ceiling mic 2)
AVerParleMic6	81-88 (ceiling mic 1) 89-96 (ceiling mic 2)

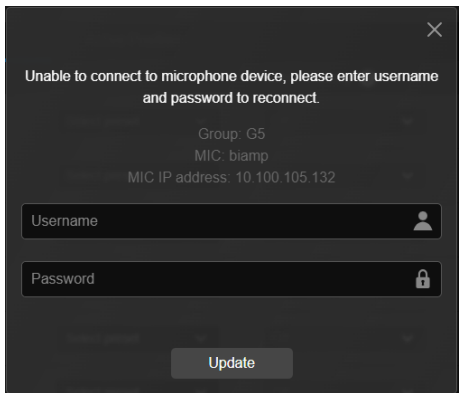

**To enable system security:**

You can protect 3rd party media control access for the Tesira system using username and password.

1. After the DSP has been configured, connect to the unprotected Tesira system with Tesira Designer Software.
2. Open the **System** page > **Security** menu > **Manage System Security...**
3. Click the **Protect System...** button to create the admin user and password.

4. You'll be prompted to enter the same set of username and password when connecting to Biamp microphones in MT300.

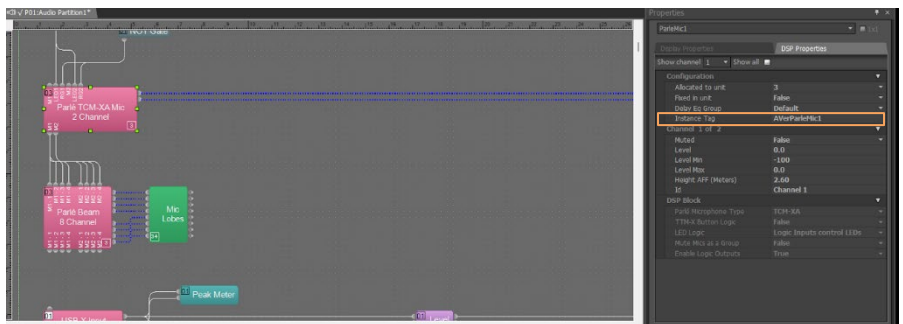

## To set up Parl  TCM-X microphones:

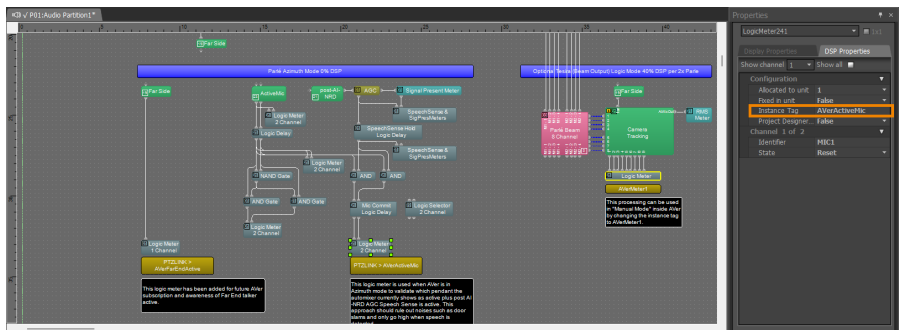

1. Open Tesira Design Software.
2. After the TCM-X microphone has been added to the layout, the instance tag of the Parl  microphone block or Logic Meter block to be controlled must use the following naming schemes.

To check or rename the instance tag of a specific block, click on that block, go to **Properties** panel > **DSP Properties** tab > **Instance Tag**.

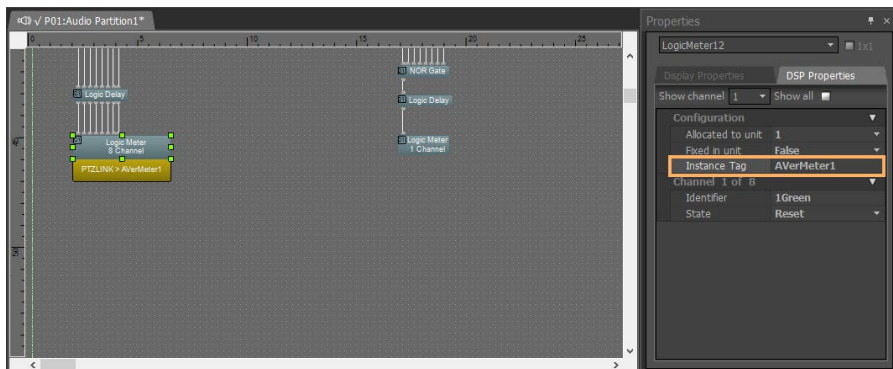

- Parl  microphone block: **AVerParleMicX** (X=1–6 starting with 1)

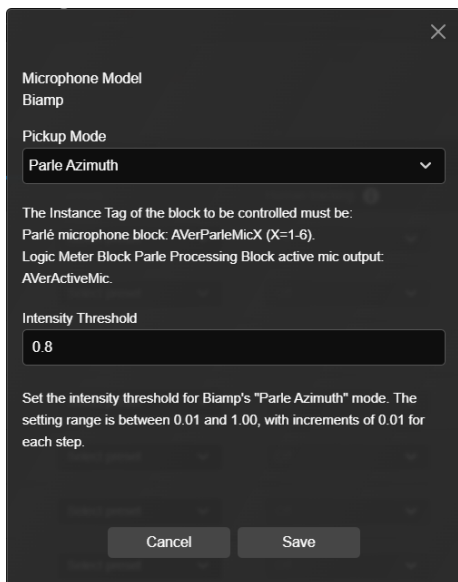

- Logic Meter Parl  Processing active mic output: **AVerActiveMic**

- Logic Meter block: **AVerMeterX** (X=1–4 starting with 1)

3. Click **Channel Configure** and select a pickup mode in MT300. Then lick **Save**.

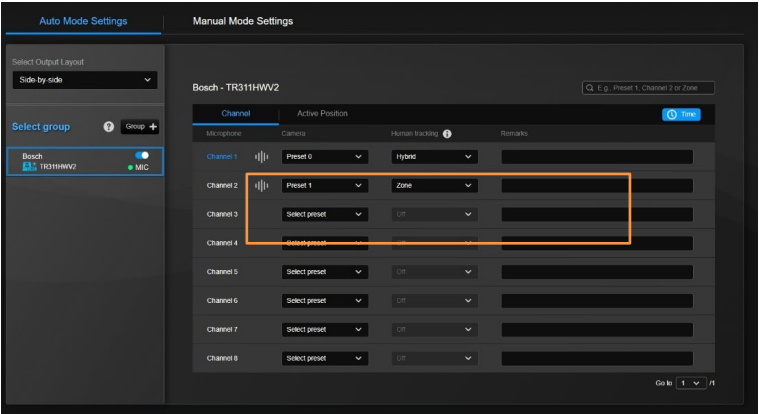

# Bosch

CCS 1000 D Digital Discussion System

DICENTIS Wireless Conference System

DICENTIS Conference System

- Each CCS 1000 D Control Unit supports up to 80 Discussion Devices.
- Assign each CCS 1000 D Discussion Device to one MT300 channel by changing the seat name.
- A discussion unit whose talk button is pressed first takes priority over others until it is mute. For example, Channel 1 (pressed first) takes priority over Channel 2 whose talk button is also pressed.

## To set up CCS 1000 D:

1. Connect to the CCS 1000 D Control Unit through IP. Access the web interface with an administrator account.
2. Go to **System Settings > Users**, create a user for MT300 with the default username/password **ptzlink/ptzlink**. The password can be changed later. For **User rights**, select **Manage meeting**.

The screenshot shows the 'User settings' page with a 'Users' table containing 'Administrator Administrator' and 'AVer Information'. A '+' icon is circled in orange. An 'Add new user' modal is open, showing fields for 'First name' (AVer), 'Last name' (Information), 'Username' (ptzlink), 'Password' (ptzlink), and 'Confirm password' (ptzlink). Under 'User rights', the 'Manage meeting' button is selected. 'Cancel' and 'Save' buttons are at the bottom.

3. Go to **System Settings > Network and general settings > General settings**, deselect **Automatically shut down the system when not used** to avoid entering standby mode.

The screenshot shows the 'Network and general settings' page. Under 'Network settings', 'Hostname' is 'ccs1000d' and 'Fixed IP' is 'No'. A 'Change network settings' button is present. The 'General settings' section is highlighted with an orange box, showing an unchecked checkbox for 'Automatically shutdown the system when not used'. A 'Factory default' button is at the bottom.

4. Go to **System Settings > Seats**, rename the **Seat name** ending with a space and a number to assign each discussion device to one MT300 channel of the same number.

Seat settings

(2-2)

	Seat name	Mode	Camera	Pre-position
<input type="checkbox"/>	Seat 1	Normal	None	
<input type="checkbox"/>	Seat 2	Normal	None	

☐ Selection mode

De-init

Remove disconnected seats

Seat 1 corresponds to channel 1, seat 2 to channel 2, and so on.

5. You'll be prompted to enter the same set of username and password when connecting to Bosch microphones in MT300.

**Note:** CCS 1000 D Control Unit allows one login at a time. When connecting CCS 1000 D Discussion Devices to MT300, make sure you are not logged in anywhere else.

- **To log in to DICENTIS System Server:**

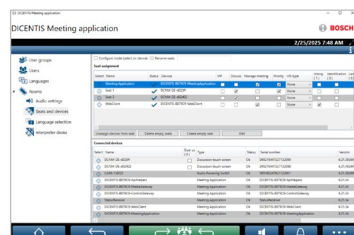

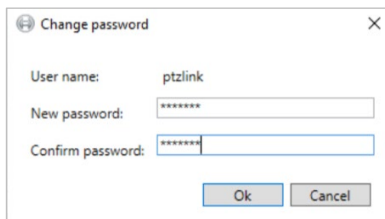

1. Open **Remote Desktop Connection** on your computer. Enter the DICENTIS server name printed on the product label.
2. Enter the credentials you purchased from Bosch. On security message pop-up window, click **Yes**.

3. Open **Bosch Meeting Application**, enter your credentials to log in. Go to **Configure** for further meeting room and user settings.
4. Click **Users** and click the Add icon to add a new user. In **Security**, select **Admin** as the User group, and then click **Change Password**.

5. Enter the default password: **ptzlink**. When finished, click **OK**.
6. Go to **Rooms > Seats and devices** to assign each microphone to MT300 channels. Seat 1 corresponds to channel 1, seat 2 to channel 2, and so on.

# ClearOne

## BMA 360 + CONVERGE® Pro 2 DSP Mixers

- CONVERGE® Pro 2 connects up to 3 daisy-chained BMA 360 microphone arrays.
- MT300 assigns 12 channels to each BMA 360. Unused channels are retained in the assigned BMA 360.

Daisy-Chained	Channel Start/End
1 <sup>st</sup> BMA 360	1-12
2 <sup>nd</sup> BMA 360	13-24
3 <sup>rd</sup> BMA 360	25-36

- When adding your device in MT300, select your MIC channels in the drop-down list according to the number of BMA 360 daisy-chained.

Add Group

## BMA 360D

- Use CONSOLE AI Lite software to select preset beam patterns for common room or custom pattern for unique floorplans of up to 12 beams.
- Each microphone beam corresponds to one MT300 channel of the same number.

# Nureva

HDL300

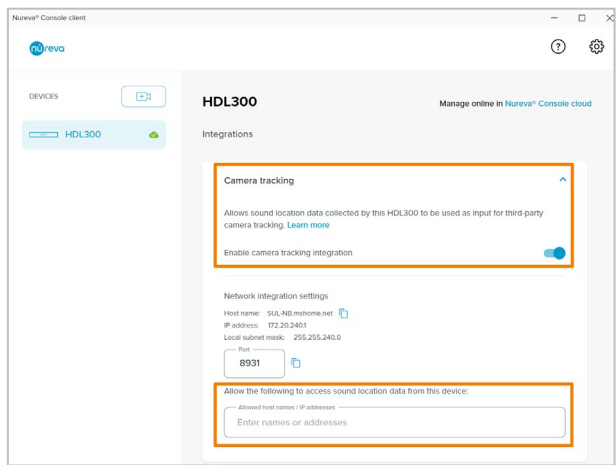

HDL310

Dual HDL300

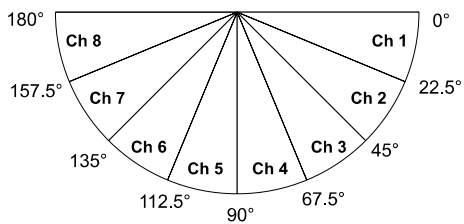

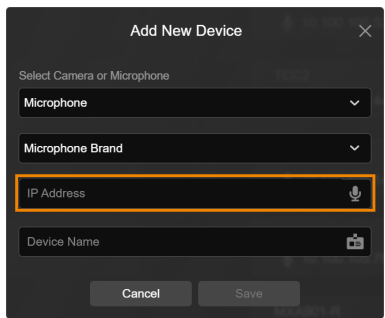

HDL410

## To set up HDL microphones:

1. In Nureva Console Client, turn on **Enable camera tracking integration**, then enter the IP address of the MT300 in the **Allowed host names / IP addresses** field.

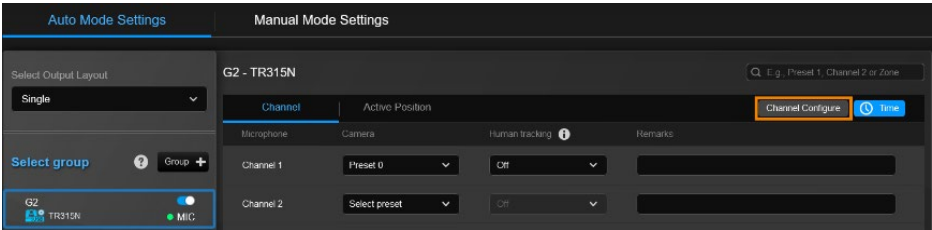

2. On the MT300 web interface, enter the IP address of the computer running Nureva Console Client in the **IP Address** field when adding microphones.  
MT300 divides HDL microphones' horizontal angles into 8-24 equal parts, which correspond to MT300 channel 1-24.

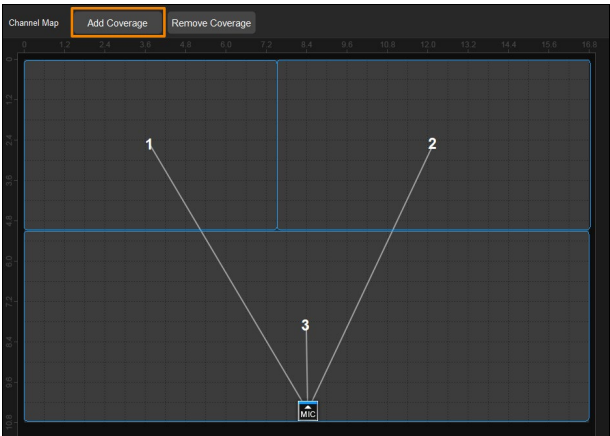

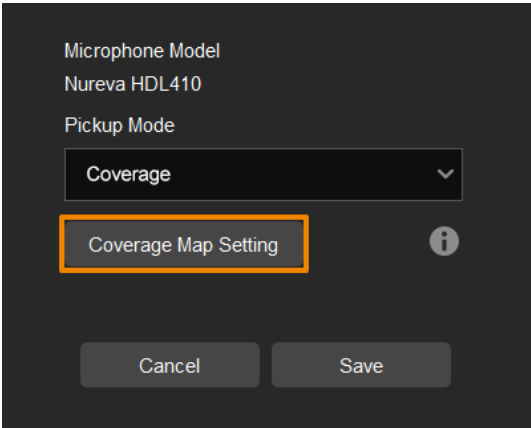

To add a coverage area for HDL410 in MT300:

- 1. Go to **Auto Mode Settings > Channel > Channel Configure**.

- 2. Select **Coverage** from the **Pickup Mode** drop-down list.
- 3. Click **Coverage Map Setting** > Click **Add Coverage**.

4. Add a coverage area by dragging it.

- You can add up to 8 coverage areas per microphone.
- When coverage areas overlap, the microphone will default to the area with the smaller number.

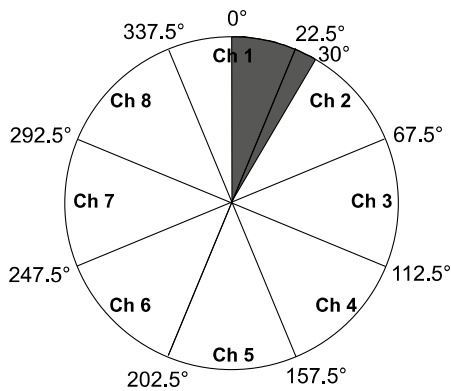

# Sennheiser

- TeamConnect Ceiling 2
- TeamConnect Ceiling Medium
- EW-DX EM 2
- EW-DX EM 2 Dante
- EW-DX EM 4 Dante
- EW-DX TS 3-Pin (and compatible microphones)
- EW-DX TS 5-Pin (and compatible microphones)

MT300 divides TeamConnect Ceiling 2's and TeamConnect Ceiling Medium's horizontal angles into 8-24 equal parts, which correspond to MT300 channel 1-24.

- TeamConnect Ceiling 2**

An Exclusion Zone set in Sennheiser Control Cockpit also affects the corresponding channel in MT300.

Sennheiser Control Cockpit

- **TeamConnect Ceiling Medium**

The 3rd party media control access for TeamConnect Ceiling Medium is encrypted and protected using username and password. It has to be enabled using Sennheiser Control Cockpit before use.

The screenshot shows the 'Access' tab in the Sennheiser Control Cockpit. The top navigation bar includes 'Audio', 'Zones', 'Device', 'Network', and 'Access'. Below the navigation bar, a header indicates 'TeamConnect Ceiling Medium 1 selected'. The main content area is divided into two panels: '3rd Party Access' and 'Device Access'. In the '3rd Party Access' panel, the 'Access' toggle is 'Activated', the 'Username' is 'api', and the 'Password' is '@User12345'. In the 'Device Access' panel, the 'Password' is masked with '\*\*\*\*' and there is a 'Change Password' button. At the bottom of the '3rd Party Access' panel are 'Ok' and 'Cancel' buttons.

**To set a 3rd Party device control password:**

1. Open Sennheiser Control Cockpit. Go to the **Access** tab in the device configuration page.
2. Activate the toggle switch.
3. Enter a password.
4. You can use the username "api" and configured password for your API calls.

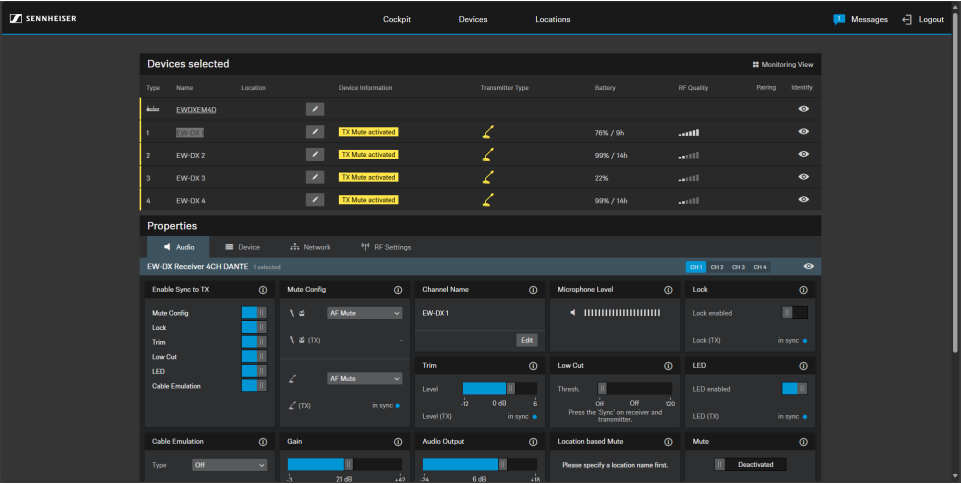

**Note:**

- If you deactivate 3rd party access, the previously set password will be deleted.
- Password must be at least 10 characters and no more than 64 characters. Use at least one lowercase letter, one uppercase letter, one number and one special character (!#\$%&()\*+,-./:;<=>?@[]^\_{}~).

- EW-DX EM 4 Dante and Transmitters

Each transmitter will connect to EW-DX 1-4, which correspond to MT300 channel 1-4.

You may log in to Sennheiser Control Cockpit to view the status of each transmitter.  
For connecting the receiver with the transmitters, please refer to Sennheriser official website:  
<https://docs.cloud.sennheiser.com/en-us/ew-d/ew-d/ew-dx-connecting-synchronizing-em.html>

## Shure

Shure® IntelliMix® P300 Audio Conferencing Processor

Shure® IntelliMix® Room Audio Processing Software

Shure® MXA310 Table Array Microphone

Shure® MXA710 Linear Array Microphone

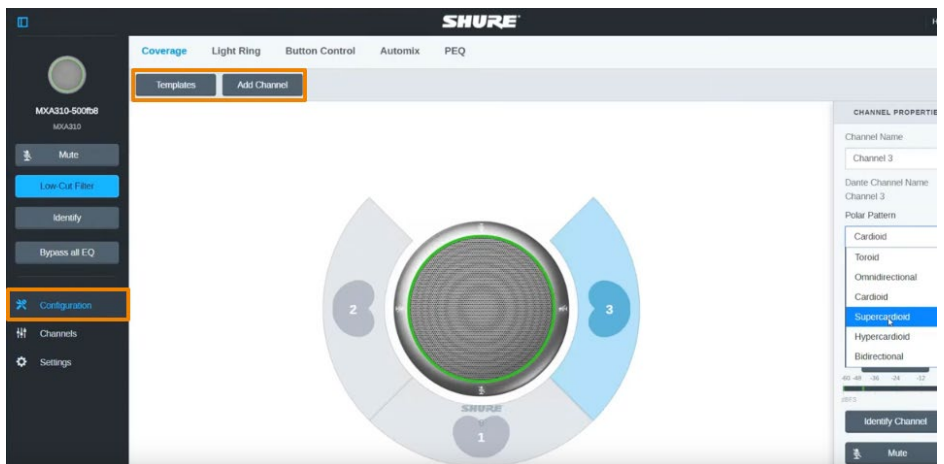

Shure® MXA910 Ceiling Array Microphone

Shure® Microflex® Complete Wireless (MXCW) System

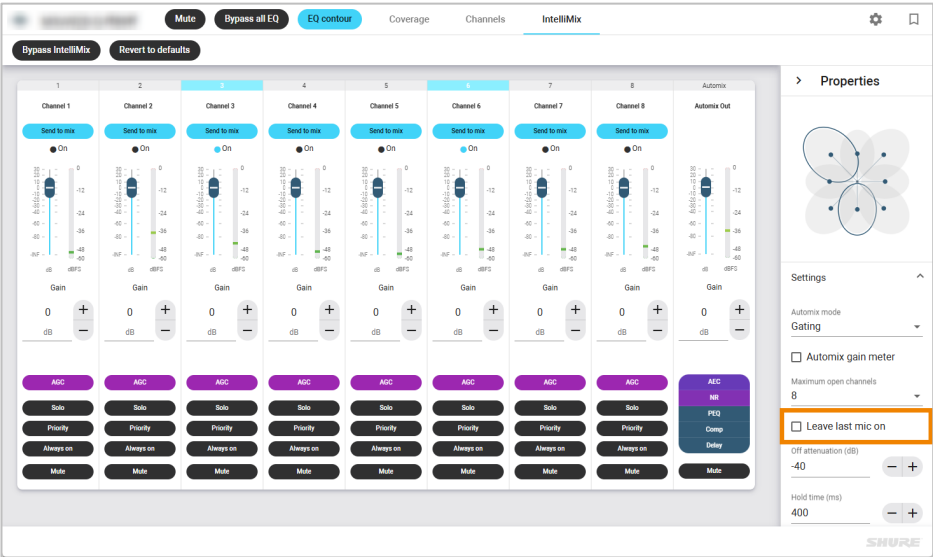

- **MXA310 Table Array Microphone**

Web Application

1. Open the **Configuration** tab.
2. Select **Template** to apply a multi-channel option or select **Add Channel** to add more than 1 channel. MT300 does not support single channel for the MXA310.

- **MXA910 Ceiling Array Microphone**

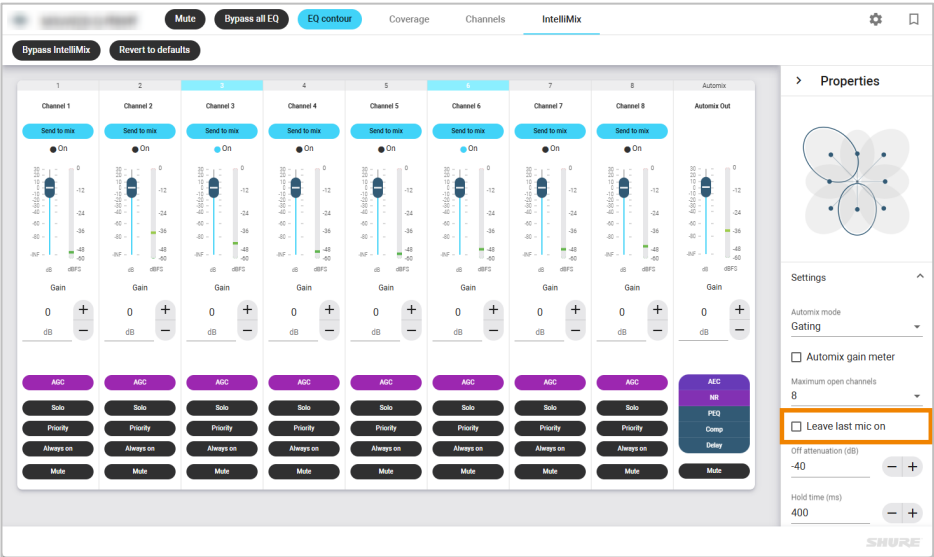

Web Application

Go to **IntelliMix > Automixer Properties > Deselect Leave last mic on.**

- **MXA920-S / MXA920-R Ceiling Array Microphone**

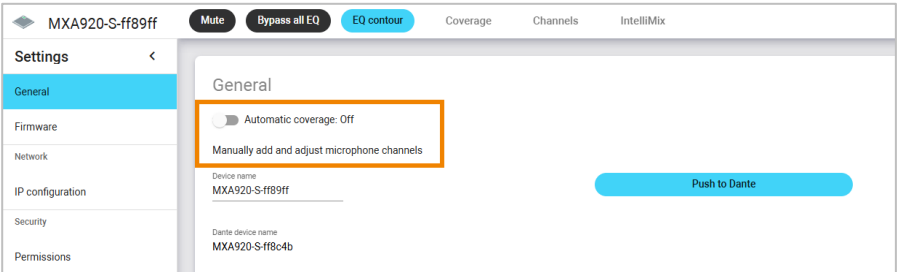

**Note:** To integrate with supported AVer camera tracking system via active talker positions, refer to [<Auto Mode \(Active Position\)>](#).

Web Application

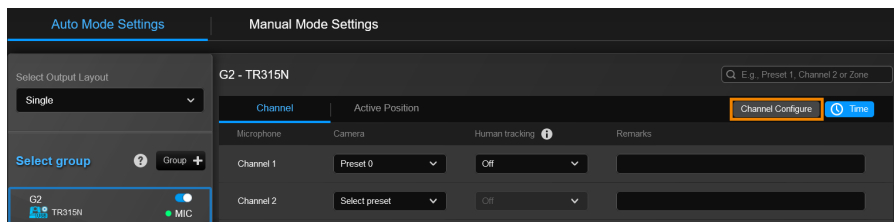

To manually position up to 8 lobes:

1. Go to **Settings > General > Turn off Automatic coverage.**

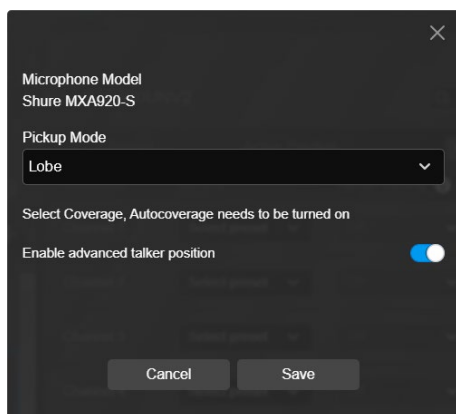

2. Go to **IntelliMix > Automixer Properties > Deselect Leave last mic on.**

3. Go to **Auto Mode Settings > Channel > Channel Configure** in MT300 > Select **Lobe** as **Pickup Mode**: The lobes you have positioned in the MXA920's web application correspond to MT300 channel 1-8.

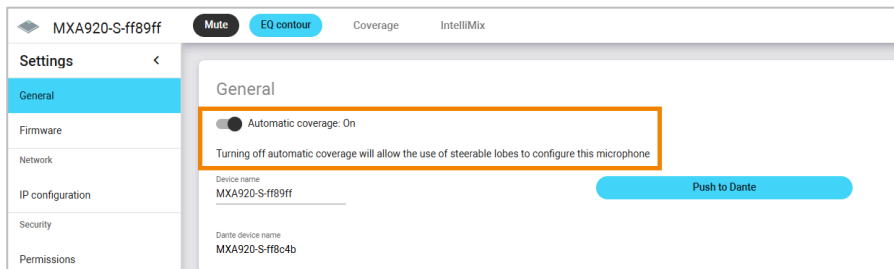

4. Turn on **Enable advanced talker position** to detect voice.

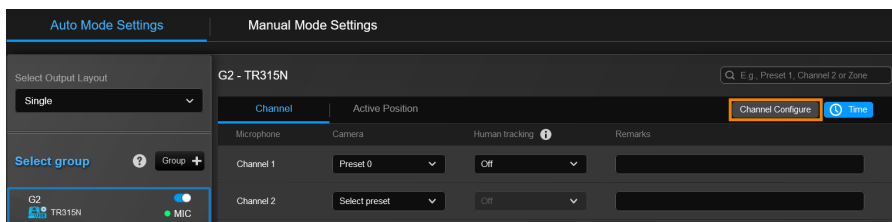

To add a mix of up to 8 dynamic and dedicated coverage areas:

1. Go to **Settings > General > Turn on Automatic coverage.**

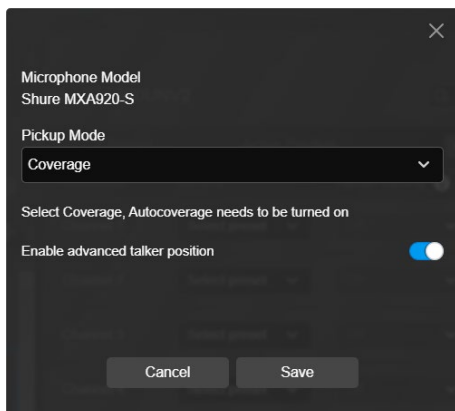

The default setting is a 30 by 30 foot (9 by 9 meter) dynamic coverage area.

2. To add more coverage areas, go to **Coverage > Add coverage.**
3. Go to **Auto Mode Settings > Channel > Channel Configure** in MT300 > select **Coverage** as **Pickup Mode**: The coverage areas you have positioned in the MXA920's web application correspond to MT300 channel 1-8.

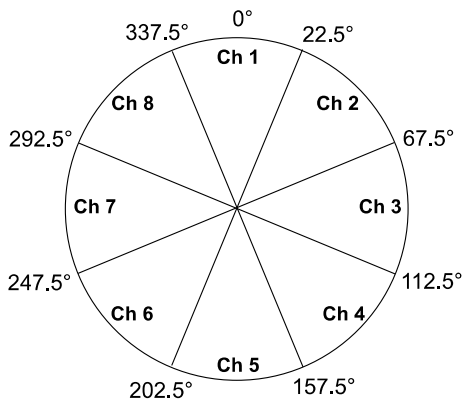

4. Turn on **Enable advanced talker position** to detect voice.

# Yamaha

- RM-CG Ceiling Array Microphone
- RM-TT Tabletop Array Microphone
- RM-CR Remote Conference Processor
- RM-W Wireless Microphone System

- MT300 divides RM-CG's horizontal angles into 8-24 equal parts, which correspond to MT300 channel 1-24.

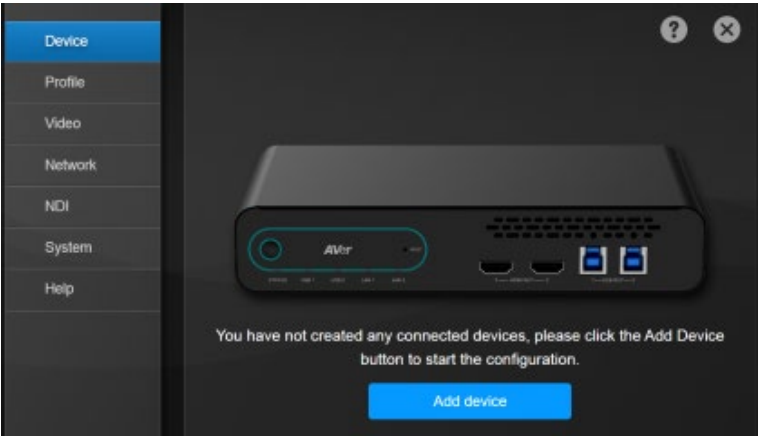

- MT300 voice tracking function requires linking more than one RM-TT or RM-W microphones for location data.
- When linking RM-TT or RM-W microphones to the RM-CR Remote Conference Processor, enter the processor's IP address in the **IP Address** field when adding microphones in MT300.

The screenshot shows the 'Add New Device' dialog box. The 'IP Address' field is highlighted with a red border, indicating it is the field where the IP address of the RM-CR Remote Conference Processor should be entered.

# Set up Your Device

## Add Devices

You can add up to 25 unique cameras and 25 unique microphones via USB, HDMI and IP.

**Note:** Although you can add up to 25 groups, Auto Mode (Channel and Active Position) supports only 7 unique cameras. Multiple groups can share the same camera.

Camera connection limits:

- IP and/or USB cameras: up to 4
- HDMI cameras: up to 3

### To add cameras and microphones:

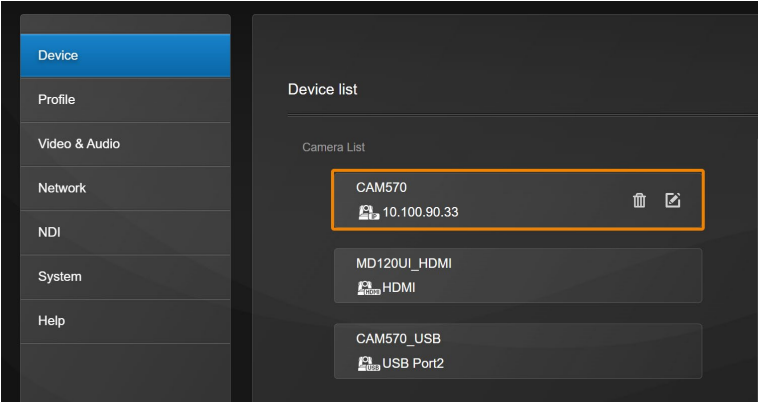

1. Click **Add Device**.  
Or click the **Settings** icon  on the top-right corner > **Device** > **Add device**.
2. Fill out the **Add New Device** dialog box.

Item	Description
Select Camera or Microphone	Add a camera or a microphone.
Connect Camera	<ul style="list-style-type: none"><li>• IP: Connect to Ethernet or PoE+ port.</li><li>• USB Port 1 and 2: Stream video.</li><li>• USB Port 3: Stream audio and video.</li><li>• HDMI: Select <b>Control via IP</b> for Human Tracking</li></ul>

	<p>functions.</p> <ul style="list-style-type: none"> <li>Non-AVer camera via IP: Select <b>Streaming via RTSP</b> and enter RTSP URL or <b>Streaming via NDI</b> and enter NDI group.</li> </ul> <p><b>Note:</b> When using non-AVer cameras, only Live Mode and Manual Mode are available. Auto Mode (voice tracking) and camera control are not supported.</p>
Microphone Brand	Select a brand from the drop-down list.
IP Address	Click <b>Auto Search</b> or enter IP address.
Camera Account	Enter camera account and password.
Camera Password	
Streaming via RTSP Streaming via NDI	<ul style="list-style-type: none"> <li>Real-Time Streaming Protocol (RTSP): Make sure your camera and receiving device or application support RTSP.</li> <li>Network Device Interface (NDI): Make sure your camera and receiving device or application support NDI. Enter a name for your NDI group (optional).</li> </ul>
Device Name	Enter a name to be displayed on the device list.

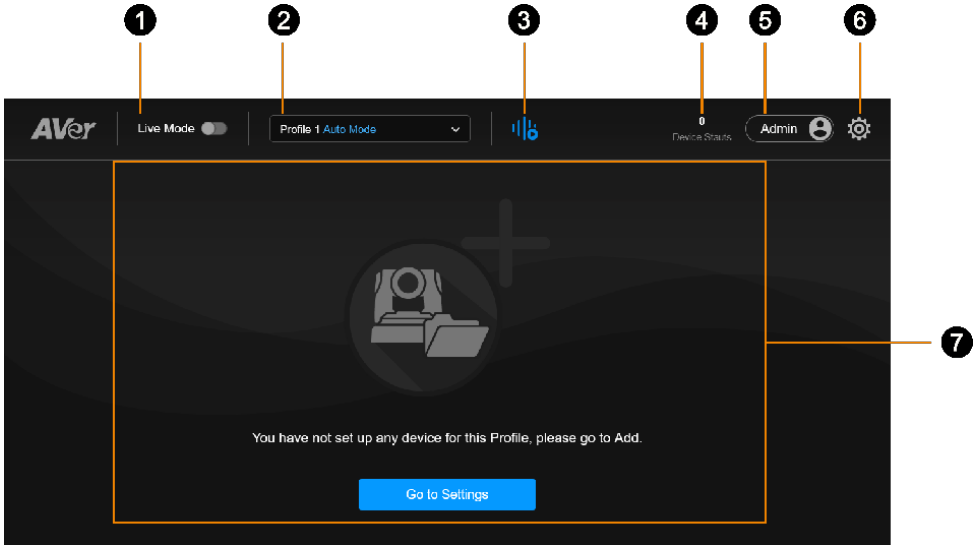

3. Click **Save**.

## Edit or Delete Devices

1. Hover over the device.
2. Click the **Pencil** icon to edit. Or click the **Trash can** icon to delete.

# User Interface

## 1. Live Mode Toggle

## 2. Select Profile

- A profile can include settings for both Auto Mode and Manual Mode, but only one mode is applied at a time.
- To switch modes, click the **Settings** icon  > **Profile**.

**Note:** When using non-AVer cameras, only Live Mode and Manual Mode are available. Auto Mode (voice tracking) and camera control are not supported.

## 3. Pause / Resume Voice Tracking

## 4. Device Count

Online device / added device count.

## 5. Account

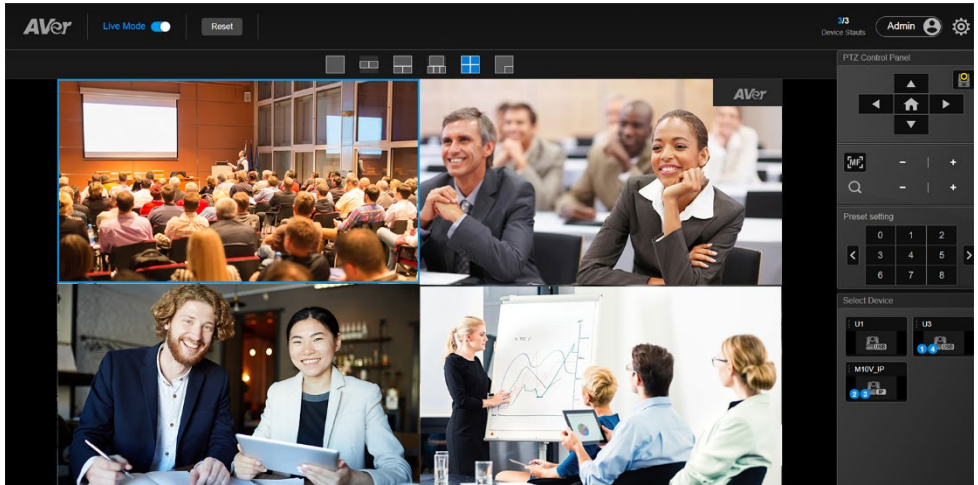

Switch between admin and user accounts. A user can use voice-tracking but cannot edit settings.

## 6. System Settings

## 7. Camera Live View

# Live Mode

See camera live views, change layouts, and use pan, tilt, zoom controls.

## To set up Live Mode:

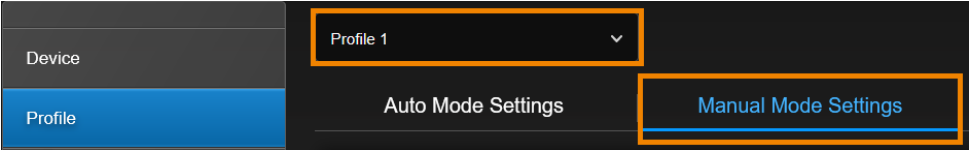

1. Toggle on **Live Mode**.
2. Select a layout.
3. Drag and drop a camera from **Select Camera** to a live view grid.  
A blue circled number will appear on the camera icon to indicate the grid position.

## To control a camera:

- Click to select a live view.  
The selected live view will be in a blue frame.
- Click a number to load a preset.
- Click the **Camera Switch** Button  (TR535, TR535N only) to switch between PTZ camera and Wide-Angle camera.
- Toggle off **Live Mode** to exit Live Mode. Live Mode settings are saved automatically. Your last selected profile in **Setting**  > **Profile** will be applied when you return to the main page.
- To clear settings, click **Reset** to reset Live Mode to factory default settings.

# Manual Mode

Use presets and Human Tracking modes to follow the presenter. You can set up a Manual Mode profile for each meeting room. Make sure you have defined required presets and configured required tracking modes on the camera web interface.

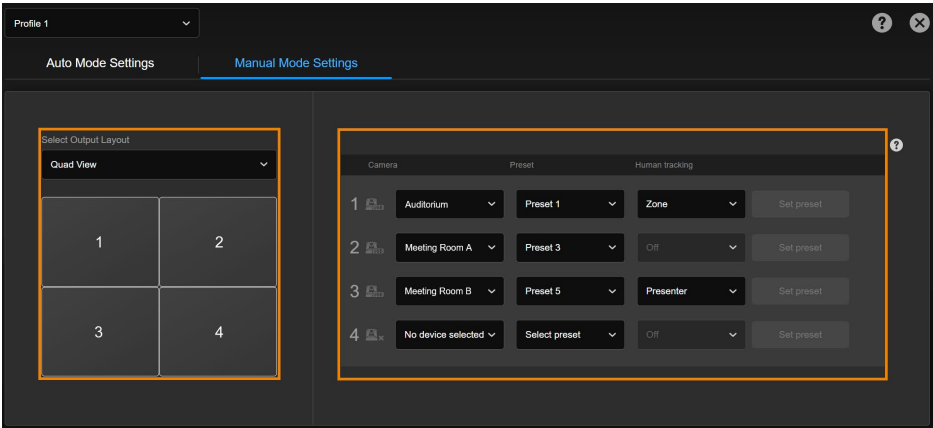

1. Click the **Settings** icon  on the top-right corner > **Profile** > **Manual Mode Settings**.

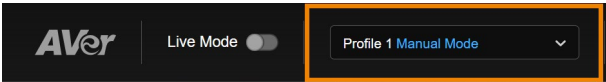

2. Create a profile.  
Choose a profile from the **Profile** drop-down list. To rename it, scroll to the bottom and click **Rename**.

**Note:** A profile can include settings for both Auto Mode and Manual Mode, but only one mode is applied at a time.

3. Select a live view layout for up to 4 cameras, then select **Camera**, **Preset**, **Human Tracking**.

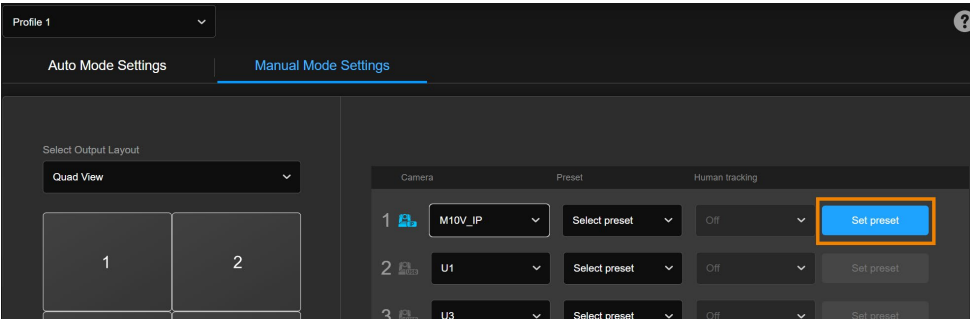

4. The profile is saved and applied automatically when you close the **Profile** page by clicking . Your Manual Mode profile will now be applied.

# Add Presets

You can also add presets on MT300.

- 1. Click **Set preset** to add presets.
- 2. Position your camera using pan, tilt, zoom controls, click a number, then click **Save** to save that position.
- 3. Click **Back** to return to the **Profile** page.

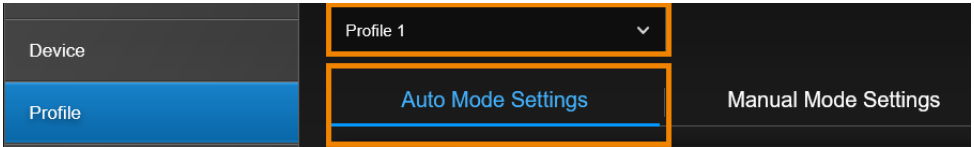

# Auto Mode (Channel)

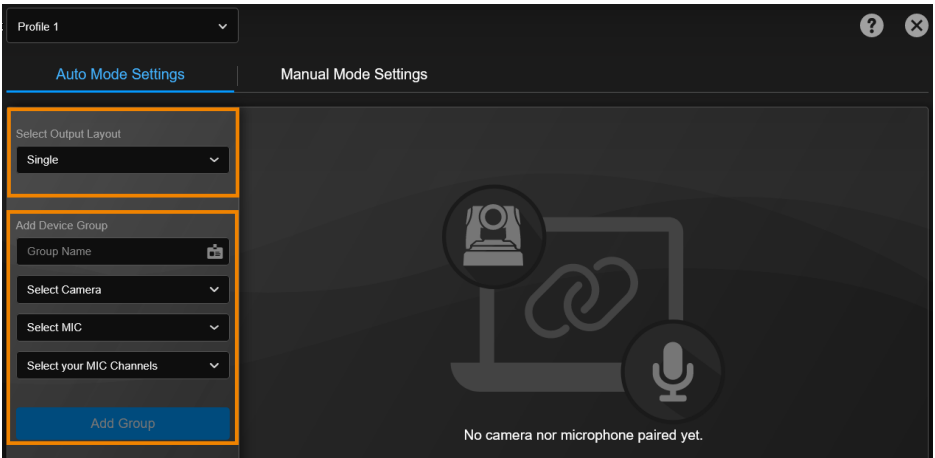

Frame the active talkers with voice tracking functionality by pairing AVer cameras with third-party microphone systems (supported models) from Audio-Technica, Biamp, Bosch, ClearOne, Nureva, Sennheiser, Shure and Yamaha.

Third-party microphone systems may require setup in their manufacture software. For microphone settings, refer to <[Supported Microphones](#)>.

**Note:** When using non-AVer cameras, only Live Mode and Manual Mode are available. Auto Mode (voice tracking) and camera control are not supported.

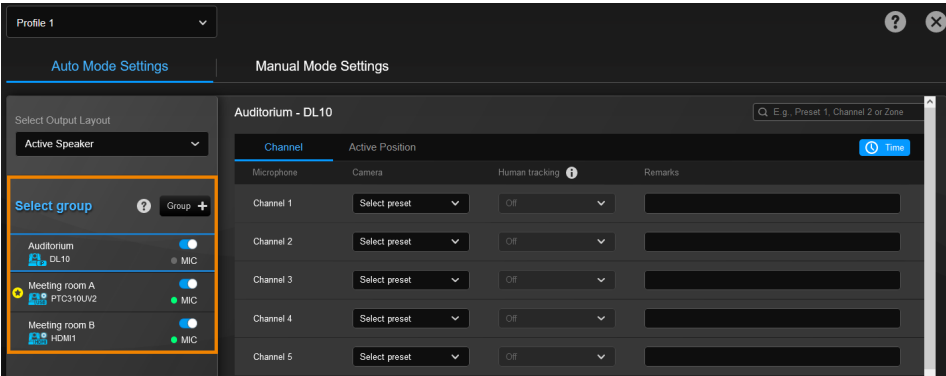

1. Click the **Settings** icon  on the top-right corner > **Profile** > **Auto Mode Settings**.
  2. Create a profile.  
Choose a profile from the **Profile** drop-down list. To rename it, scroll to the bottom and click **Rename**.
- Note:** A profile can include settings for both Auto Mode and Manual Mode, but only one mode is applied at a time.
3. Select a layout for up to 4 cameras, then add up to 25 AVer camera and microphone groups. Refer to <[Select Group Panel](#)> for layout details.

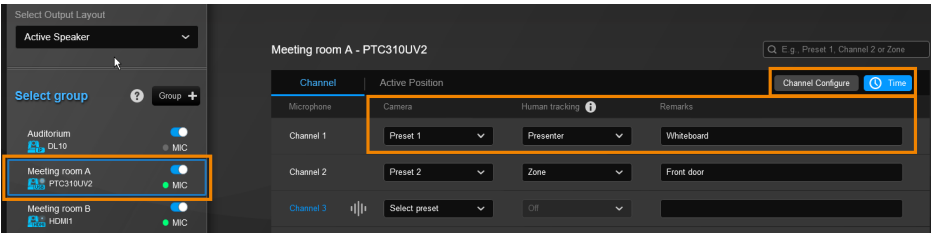

- Added device groups will appear under **Select group**.

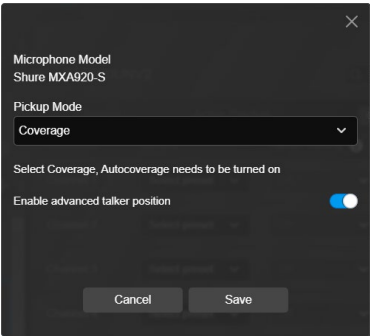

You can also assign a priority Group if multiple device groups share the same camera. Refer to [<Assign a Priority Group>](#).

- Select a device group to pair microphone channels with presets.  
A blue frame indicates that it is selected.

- Select a preset and Human Tracking mode for each channel.
- Add remarks to help identify the location.
- Click **Channel Configure** to select a pickup mode based on your microphone setting. Then click **Save**.

9. Click the **Time** button  to set a delay before the camera goes to a preset.

Item	Description
Time to trigger Preset	Set a delay before the camera goes to a preset.
Multiple Speakers Mode behavior	<div>Controls how the camera reacts when multiple people are speaking:</div> <div><div>1. Enable the mode by selecting <b>Back to Preset 0</b>. The last-used camera will go to Preset 0.</div><div><div>Note:</div><div>To choose a different preset other than Preset 0, you can <a href="#">assign a priority group</a>.</div></div><div>2. Set a delay before entering and exiting Multiple Speakers Mode in <b>Time to trigger</b> and <b>Time to quit</b>.</div><div>3. Optionally, adjust how speaker are detected by toggling these filters on or off. Refer to <a href="#">&lt;How Multiple Speakers Mode Works&gt;</a> for details.</div></div>

	<div> Count speaker by audio signal <div></div> </div> <div> Only count the channel with preset position <div></div> </div>
Time to go to Preset 0	Set a delay before the last-used camera goes to preset 0 when the microphone detects no sound. <div> <b>Note:</b> <ul style="list-style-type: none"> <li>To choose a different preset other than Preset 0, you can <a href="#">assign a priority group</a>.</li> <li>The duration of <b>Time to go to Preset 0</b> must be longer than <b>Time to trigger Preset</b>.</li> </ul> </div>
Far end speakers trigger Preset 0 (Sennheiser microphones only)	If the microphone detects voice from the far end of the room, such as during a video conference, the last-used camera will go to preset 0. <div> <b>Note:</b> To choose a different preset other than Preset 0, you can <a href="#">assign a priority group</a>. </div>

10. Check the active channel (blue highlight) or audio signal to confirm the camera's location and preset status.

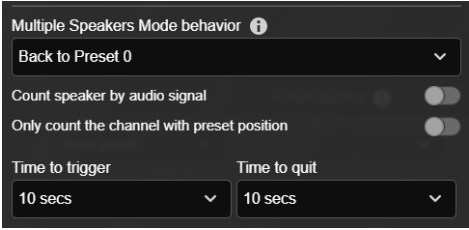

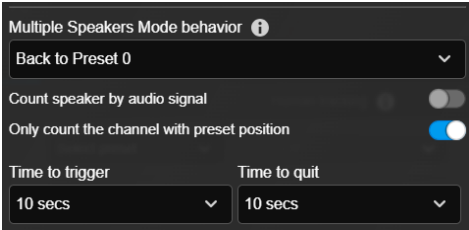

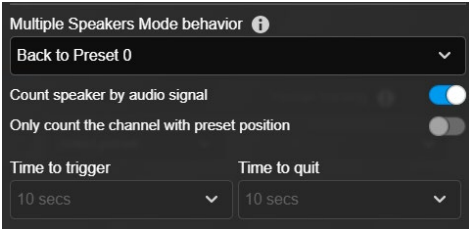

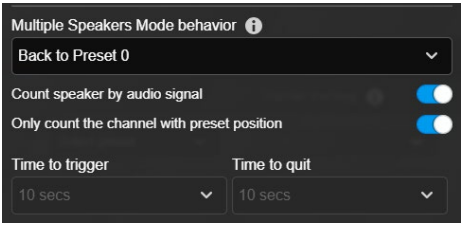

Type of channels	Example
Active channel (blue highlight) + a preset  An active channel indicates the camera's location.	
Active channel (blue highlight) (no preset)  An active channel can be without a preset.	
Audio signal icon  An audio signal icon channel indicates that the channel detects sound.	

11. Click to close and save the profile. The profile will be applied automatically.

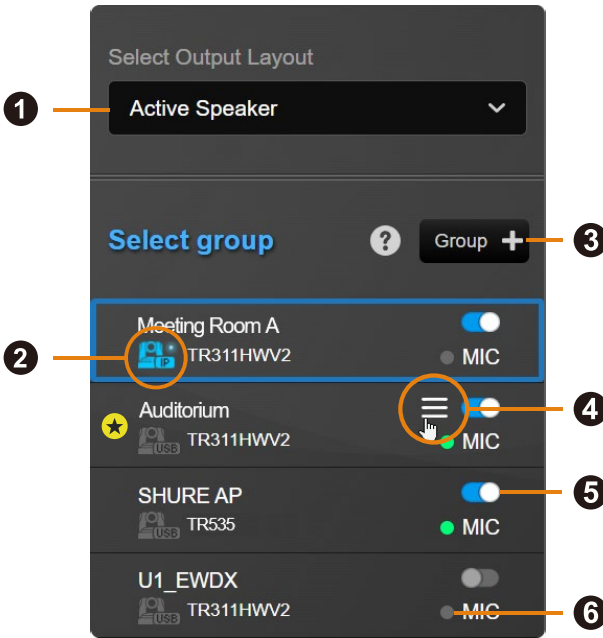

# How Multiple Speakers Mode Works

Multiple Speakers Mode automatically moves the camera to a defined preset to frame the group when multiple people are speaking. For ceiling microphone and gooseneck microphone, we recommend you use different settings as the follows:

Suggested Microphone	Filter	Enter Multiple Speakers Mode After
Ceiling microphone	Both toggles off 	Detecting sound from 3 different active channels within the selected <b>Time to trigger</b> .  <i>(Active channels with or without presets.)</i>
Ceiling microphone	Toggle on <b>Only count the channel with preset positions</b> 	Detecting sound from 3 different active channels <b>with presets</b> within the selected <b>Time to trigger</b> .
Gooseneck microphone	Toggle on <b>Count speaker by audio signal</b> 	Detecting 2 or more audio signal at the same time.  <i>(Active channels with or without presets.)</i>
Gooseneck microphone	Both toggles on 	Detecting 2 or more audio signal with presets at the same time.

**Note:** The durations of **Time to trigger** and **Time to quit** must each be at least 3 times that of **Time to trigger preset**.

## Select Group Panel

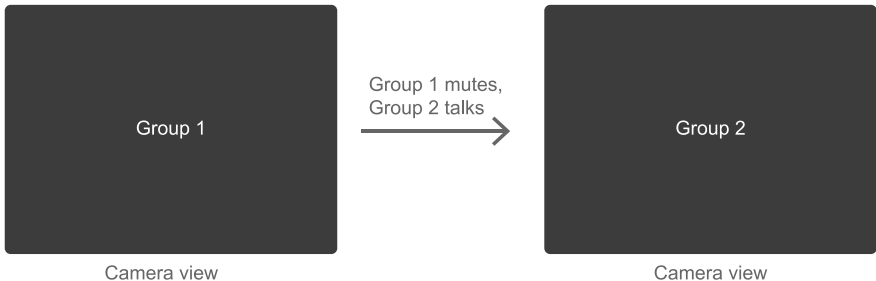

### 1. Select Output Layout

- **Single:**

Displays current active channel's camera view in full-screen.

When all channels are muted, it shows the camera view of the first group in the list.

When one channel is muted, the next active channel will take over the full-screen.

• **Side-by-side:**

Displays the camera views of two active channels side by side.

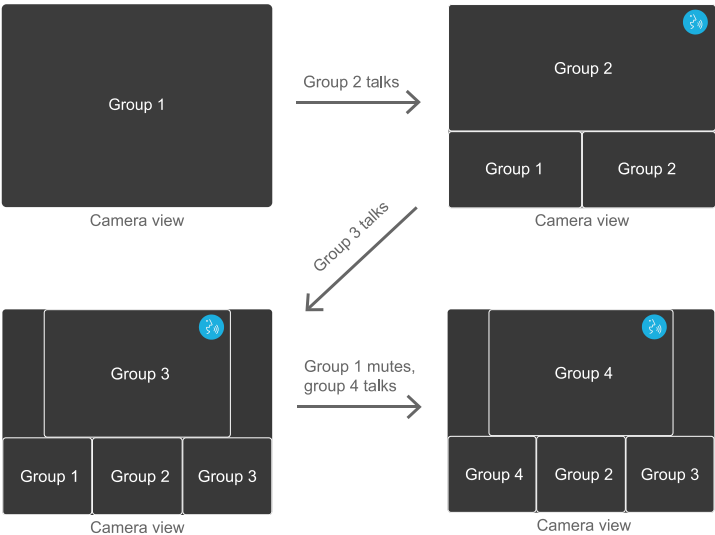

When one channel is muted, the next active channel takes the first available grid.

• **Active Speaker:**

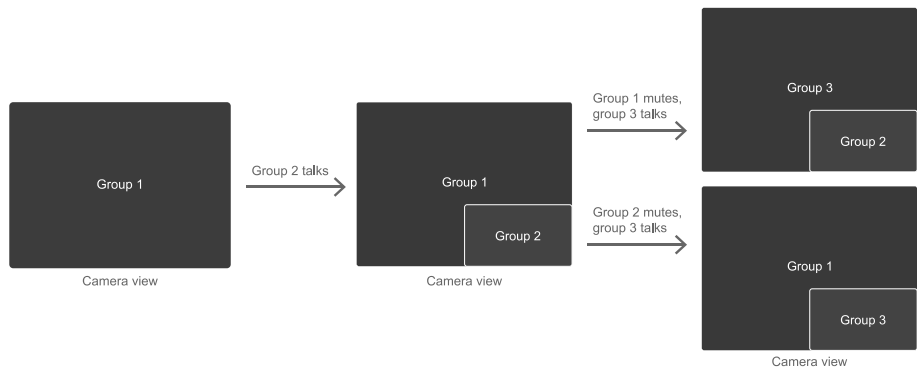

Dynamically displays the current active channel in the top large grid, while up to three standby channels appear in smaller grids on the second row.

When one channel is muted, the next active channel takes the first available grid.

• **PIP (Picture-in-Picture):**

Displays two active channels in full-screen with a smaller grid.  
When one channel is muted, the next active channel takes the first available grid.

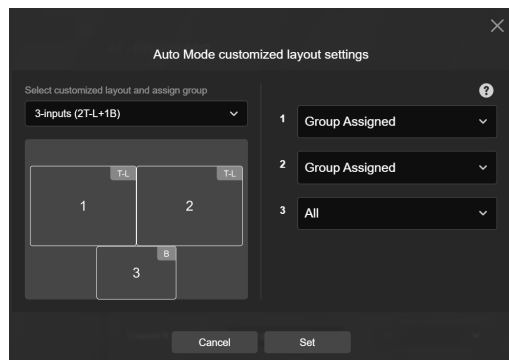

**Notes:**

When all channels are muted, it shows the camera view of the first group in the list, sorted alphabetically. To change the order, rename the group accordingly.

• **Customized:**

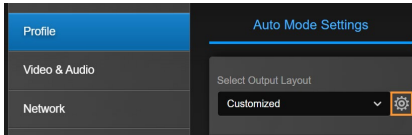

- ① Customize your display layout by selecting an option from the drop-down list and reviewing the layout preview.
- ② Select one, multiple, or all camera groups to assign to the layout grids.
- ③ When finished, click **Set**, the drop-down list will display “Group Assigned” or “All”.

**Note:**

- T: Top, L: Large, B: Bottom.
- In live view, when a channel is muted, the next active channel takes its assigned grid.
- If you wish to disable human tracking for a specific display grid, make sure that you clear all camera presets for the group assigned to that grid.  
(Profile > Auto Mode Settings > Select group)
- Priority group function is not available when selecting customized layout.

- ④ To change layout and assigned groups, click on the **Setting** icon on **Select Output Layout**.

## 2. Camera status

Click the **question mark** icon  for descriptions.

Icon	Status
	Camera is sending data to MT300
	Device online
	Device offline
	Incorrect account or password

## 3. Group +

Add a camera and microphone group.

## 4. Hamburger Menu

Hover your cursor over a device group to see the hamburger menu.

- Set preset: Add camera presets.
- Edit group
- Delete group
- Group overlay priority: Assign a priority group .
- Pin this group (Hybrid layout only): Pin a group to the top grid. .

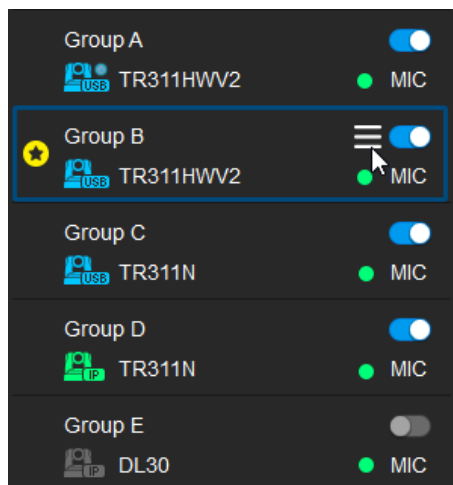

## 5. Toggle

Enable or disable a device group.

## 6. Microphone Status

- Green: Online
- Gray: Offline

## Assign a Priority Group

You can assign a priority group for the camera to go to when:

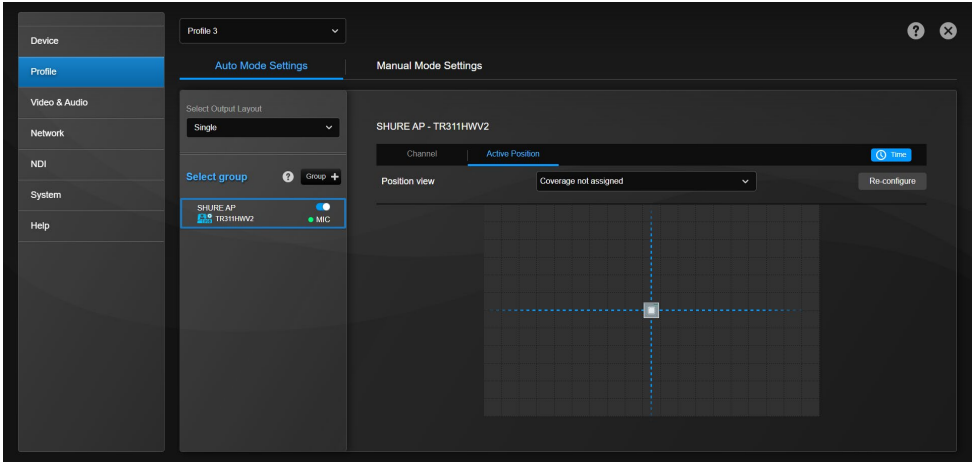

- Multiple groups share a camera.
- Microphone detects no sound (default preset 0).
- Multiple Speakers Mode activates (default preset 0).
- Microphone detects far end speakers (Sennheiser microphones only, default preset 0)

1. Hover the cursor over a group, then click the **hamburger** icon .
2. Select **Priority**. The **star** icon  will indicate a priority group.
3. To cancel priority, deselect **Priority**.

# Auto Mode (Active Position)

Active Position reports active talker positions from supported microphones in the form of X, Y, Z coordinates to deliver enhanced camera tracking.

**Note:** When using non-AVer cameras, only Live Mode and Manual Mode are available. Auto Mode (voice tracking) and camera control are not supported.

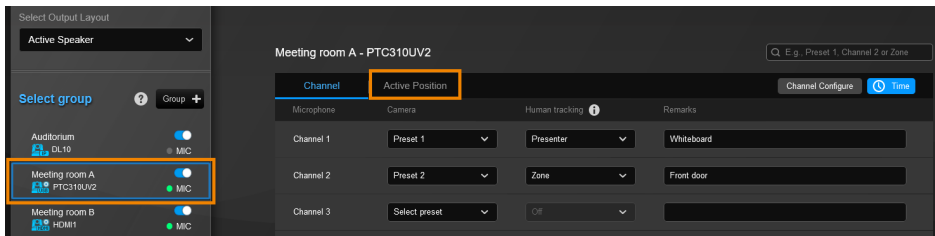

## Supported Devices

USB- and IP-connected [supported AVer Devices](#)  
Shure® MXA920-S / MXA920-R Ceiling Array Microphone

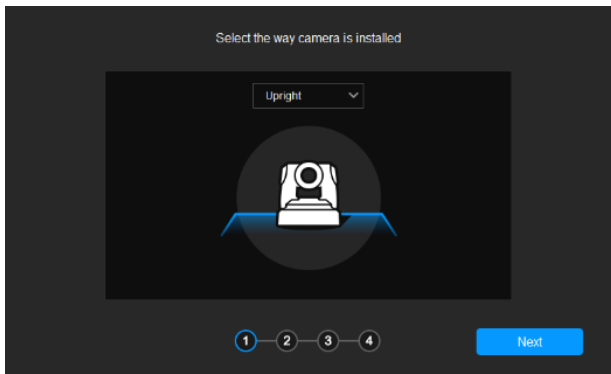

**Note:** For optimal audio tracking performance, you may go to Shure microphone web application to set the height value.

# Square Microphone Calibration

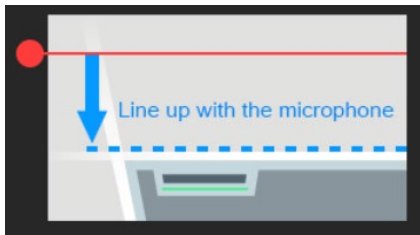

- 1. Make sure the camera has been paired with a microphone.
- 2. Click to select a device group. A blue frame will indicate that it is selected.

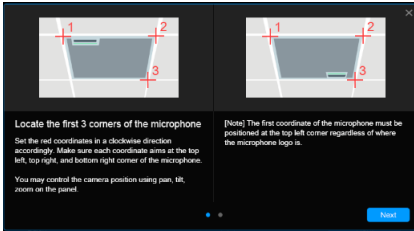

- 3. Click the **Active Position** tab and follow the setup wizard. Click the question mark in the top-right corner for instructions.

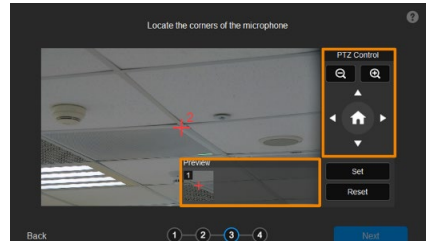

- ① Drag the red dot to align the red line to the top or bottom edge of the microphone.
- ② The microphone doesn't need to be in the center of the live view, as long as the red line is aligned to the edge. Adjust the camera angle using pan, tilt and zoom controls, if the microphone appears at a slight angle.

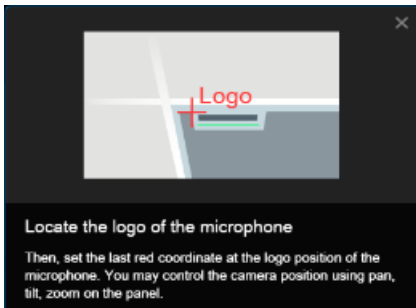

- ③ Starting from the top left, locate 3 microphone corners in a clockwise direction with a red cross.

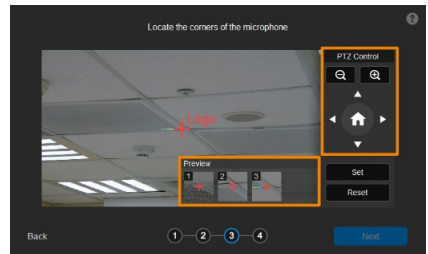

- ④ Click Set. The saved location will appear in the thumbnail.

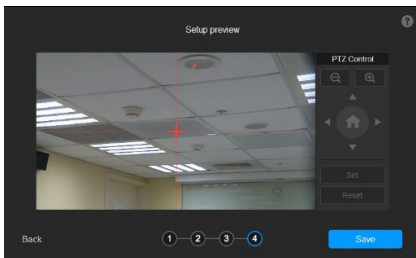

- ⑤ Finally, locate the logo on the microphone to indicate its orientation. Depending on the microphone orientation, the logo corner may be the same as one of the 3 corners.

- ⑥ Click Next after locating 3 corners and the logo. Or click Reset to relocate all of them.

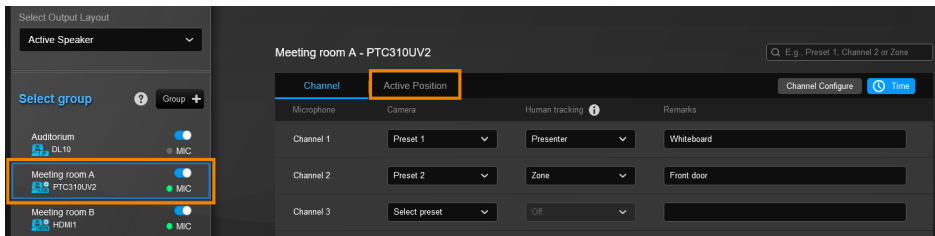

- ⑦ Make sure the red cross appears in the center of the microphone, and click **Save**. Or click **Back** to reconfigure.

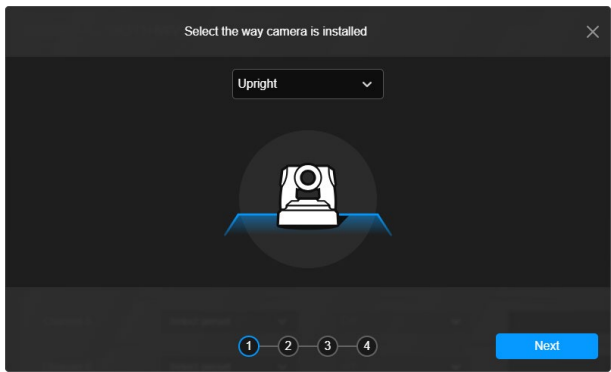

# Round Microphone Calibration

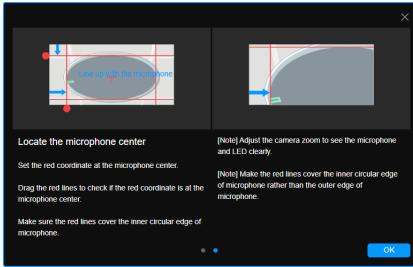

- 1. Make sure the camera has been paired with a microphone.
- 2. Click to select a device group. A blue frame will indicate that it is selected.

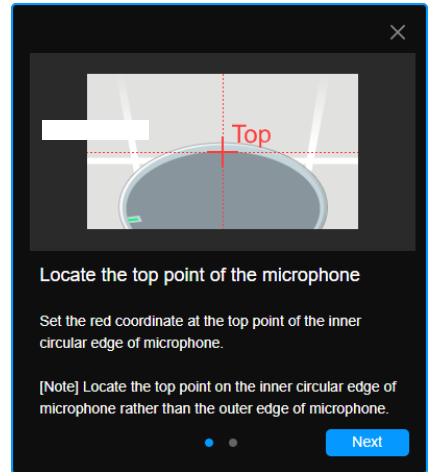

- 3. Click the **Active Position** tab and follow the setup wizard. Click the question mark  in the top-right corner for instructions.

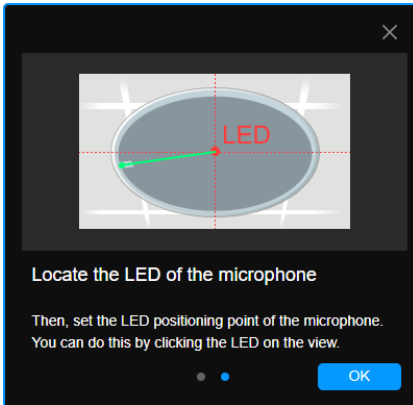

- ① Dragging the red dot to align the red lines to the top and left edge of the inner diameter so that the red cross appears at the center.

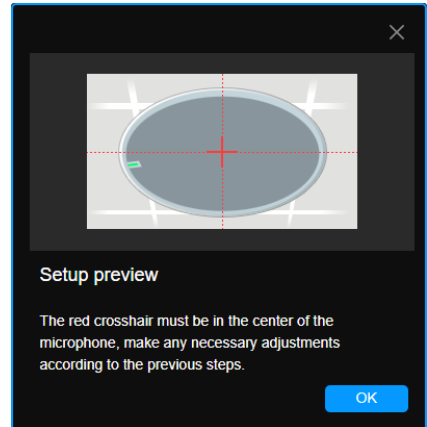

- ② Locate the top point of the inner diameter with the red cross.

- ③ Click to mark the position of the LED.

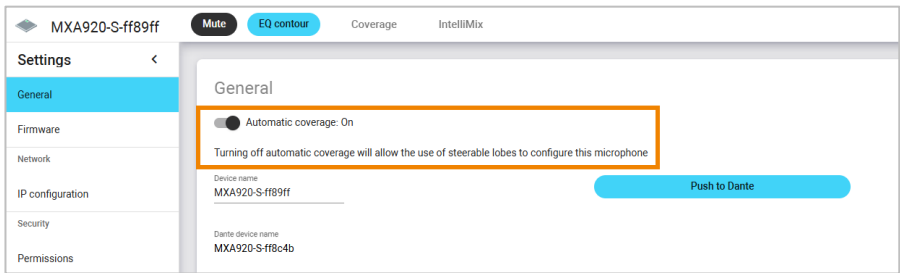

- ④ Make sure the red cross appears in the center of the microphone, and click **Save**. Or click **Back** to reconfigure.

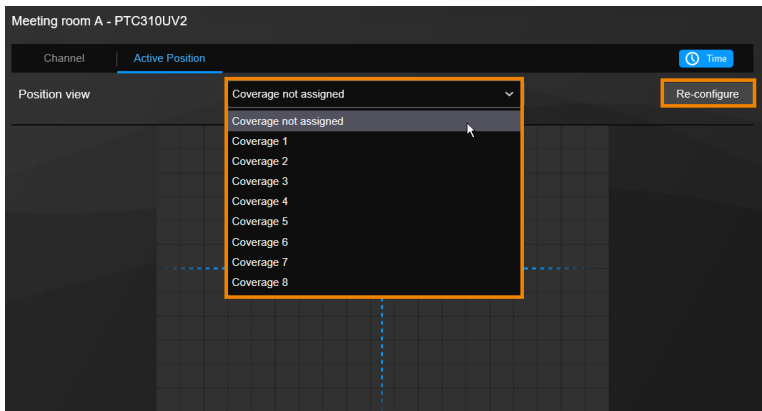

# Add a Coverage Area

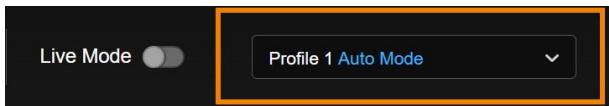

- 1. On the MXA920 web application, go to **Settings > General > Automatic coverage**.
- 2. Turn on **Automatic coverage** to add a mix of up to 8 dynamic and dedicated coverage areas,. The default setting is a 30 by 30 foot (9 by 9 meter) dynamic coverage area.

- 3. To add more coverage areas, go to **Coverage > Add coverage**.
- 4. Go to **Active Position** tab > select **Coverage not assigned** to use all coverage areas. Or select a coverage area that you have added in the microphone web application from the drop-down list. Talker positions outside of the selected coverage area won't be picked up by MT300.

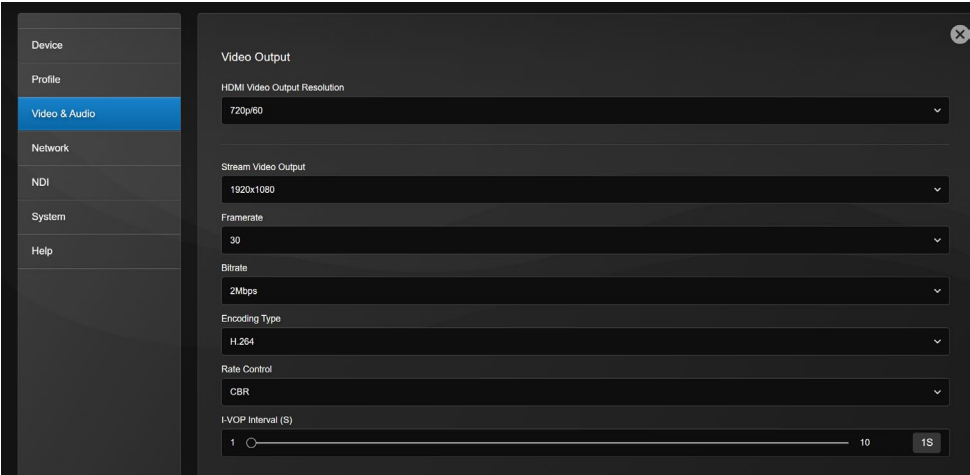

- 5. To change coverage areas, click **Re-configure**.
- 6. The profile is saved and applied automatically when you close the **Profile** page by clicking . Your Auto Mode profile will now be applied.

# System Settings

## Video & Audio

### Video Output

Item	Description
HDMI Video Output Resolution	Choose a video output resolution.
Stream Video Output	Choose a streaming output resolution for the live view.
Framerate	Choose a framerate.
Bitrate	Choose a bit rate.
Encoding Type	Choose <b>H.264</b> or <b>H.265</b> .
Rate Control	Choose Variable Bit Rate ( <b>VBR</b> ) or Constant Bit Rate ( <b>CBR</b> ).
I-VOP Interval (S)	Drag the slider to choose how often I-VOPs appear in a video stream. <ul style="list-style-type: none"><li>Shorter I-VOP intervals result in higher video quality but also larger file sizes.</li></ul>
USB Output	Choose a USB output source. <ul style="list-style-type: none"><li>Auto: Automatic detection.</li><li>USB #1: USB out port 1.</li><li>USB #2: USB out port 2.</li></ul>
Switching Camera Delay Time	Choose a delay time to avoid displaying the live view when the camera is in motion; it will refresh once the delay time is up.
Auto-center on speaker	Keep the speaker at the center of the screen after the camera moves to a preset.

	<p><b>Note:</b></p> <ul style="list-style-type: none"><li>• Auto-center on speaker is available for IP cameras, HDMI cameras (when controlled by IP), and in Auto Mode – Channel only.</li><li>• This feature is unavailable when human tracking is enabled. To use it, turn off human tracking.</li></ul>
--	--

Click <b>Browse</b> to select the certificate file, and then click <b>Upload</b>.</li><li>4. Turn on <b>HTTPS</b>.</li></ol>

# NDI

Network Device Interface (NDI) protocol transmits high-quality, low-latency video and audio streams over IP networks.

Tracking box comes in two models: MT300 (without NDI) and MT300N (with NDI). To purchase NDI|HX upgrade, please visit NewTek Online Store (<https://store.newtek.com/ndi-hx-upgrade-for-cameras.html#>).

Item	Description
Local Device Name	Enter a name that identifies your camera group on the NDI software.
Device Channel (Device ID)	Enter a name that identifies your camera on the NDI software. <ul style="list-style-type: none"><li>• The default is MT300 or MT300N.</li><li>• Use no more than 10 characters, upper and lowercase letters, numbers and punctuation marks (! @ % ^ , . / : + ? [ ] { } - _ ~).</li></ul>
Receive Group	Enter a name for a receive group. <ul style="list-style-type: none"><li>• All devices in the receive group receive the same NDI streams.</li><li>• The receive group should remain <b>public</b>. If this is changed, you will need to join the group through NDI® Access Manager.</li></ul>
Reliable UDP	Enable Reliable User Datagram Protocol (RUDP) to improve streaming quality.
Discovery Server	Select the checkbox to enable discovery server to allow devices to discover and connect to each other on a network automatically.

Discovery Server Address	Enter the IP address of a server running a discovery server application.
Multicast Server	Select the checkbox to enable multicast server to allow efficient distribution of NDI streams to multiple receivers without overwhelming the network.
Multicast Server Address	Enter the IP address of a group of recipients that receive NDI streams from a multicast server.
Multicast Server Mask	Enter the network mask to specify the range of IP addresses that are eligible to receive NDI streams.
Multicast TTL	Enter a multicast time to live (TTL) value between 1-255 to control the distance multicast packets can travel.

# Troubleshoot

## Using non-AVer cameras.

When using non-AVer cameras, only Live Mode and Manual Mode are available. Auto Mode (voice tracking) and camera control are not supported.

The device is optimized for AVer equipment. Performance with third-party cameras is not guaranteed.

## No human tracking.

- Make sure your camera supports human tracking. For supported AVer devices, refer to [<Supported AVer Devices>](#).
- If your camera is connected via HDMI, make sure you select **Control via IP**.  
Hover over the device in the device list and click the **Pencil** icon to edit.

## Camera is too sensitive and flickering between presets.

- Select a longer duration for Time to Trigger Preset.
- If your camera is shared among several camera and microphone groups, [assign a priority group](#).

## Stop voice-tracking.

- Click the **voice tracking** icon  on the main page to pause voice tracking for the current profile.
- Mute the microphone by pressing its physical button or accessing its web interface.
- Use the toggle switch on the Select Group Panel to disable the group.  
Single video output: Audio is muted while video is still transmitting.  
Multiple video output: Both audio and video stop transmitting.

# TCP Commands

A TCP command string starts with AVER:[account]:[password]:/request=X, and ends with \r\n. X is as HTTP requests above. For example, AVER:[account]:[password]:/request=pause\r\n, AVER:[account]:[password]:/request=resume \r\n, and so on.

# VISCA Command Table

MT300(N) also can be controlled via below VISCA over IP commands, but does not support VISCA RS-422 commands.

VISCA over IP

PORT

Internet protocol	IPv4
Transport protocol	UDP
Port address	52381

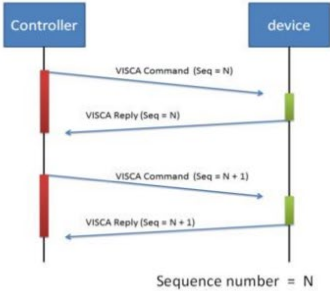

FORMAT

	byte 0	byte 1	byte 2	byte 3	byte 4	byte 5	byte 6	byte 7	byte8 ~~~~~ byte23
func	Payload type		Payload length		Sequence number				Payload (1 to 16 bytes)
data	Value1	Value2	1~16 (0x0001~0x0010)		0X00000000 ~ 0XFFFFFFF				VISCA Packet (see page VISCA)

Payload type

Name	Value1	Value2	Description
VISCA command	0x01	0x00	Stores the VISCA command.
VISCA inquiry	0x01	0x10	Stores the VISCA inquiry.
VISCA reply	0x01	0x11	Stores the reply for the VISCA command or VISCA inquiry

Sequence number

Command Set	Command	Command Packet	Comments
Power	OFF	8x 01 04 00 03 FF	Power off MT300
Voice Tracking	Pause	8x 01 04 7D 03 00 FF	Pause voice tracking
	Resume	8x 01 04 7D 02 00 FF	Resume voice tracking
System	Change Profile	8x 01 04 40 01 YY FF	YY = profile num(0x01~0x24)
		8x 01 04 3F 02 YY FF	Preset recall, YY = profile num(0x01~0x24)
	Reboot	8x 01 04 A4 FF	Reboot MT300
	Switch USB Output	8x 01 7E 03 01 FF	USB port 1
		8x 01 7E 03 02 FF	USB port 2

**Command samples:**

Command Set	Command	Command Packet	Comments
Power	OFF	01 00 00 07 00 00 00 01 81 01 04 00 03 FF	Power off MT300
Voice Tracking	Pause	01 00 00 07 00 00 00 01 81 01 04 7D 03 00 FF	Pause voice tracking
