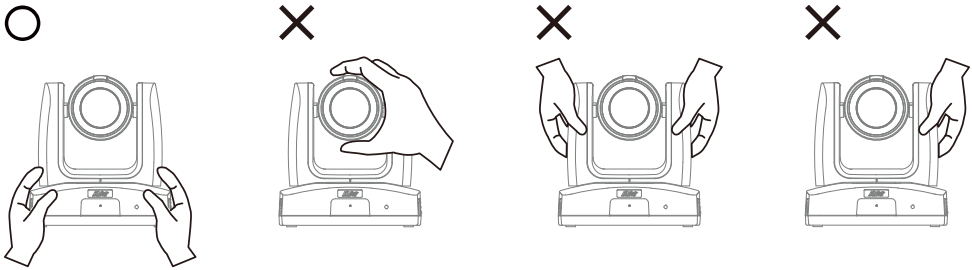
Warning



- To reduce the risk of fire or electric shock, do not expose this appliance to rain or moisture. Warranty will be void if any unauthorized modifications are done to the product.
- Do not drop the camera or subject it to physical shock.
- Use the correct power supply voltage to avoid the damaging camera.
- Do not place the camera where the cord can be stepped on as this may result in fraying or damage to the lead or the plug.
- Hold the bottom of the camera with both hands to move the camera. Do not grab the lens or lens holder to move the camera.

Federal Communications Commission

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radiofrequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

This Class A digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

PSTI Statement of Compliance

Please refer to the following website: https://www.aver.com/product-security-advisory

Warning

This is a class A product. In a domestic environment, this product may cause radio interference in which case the user may be required to take adequate measures.

Caution

Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.

VCCI-A

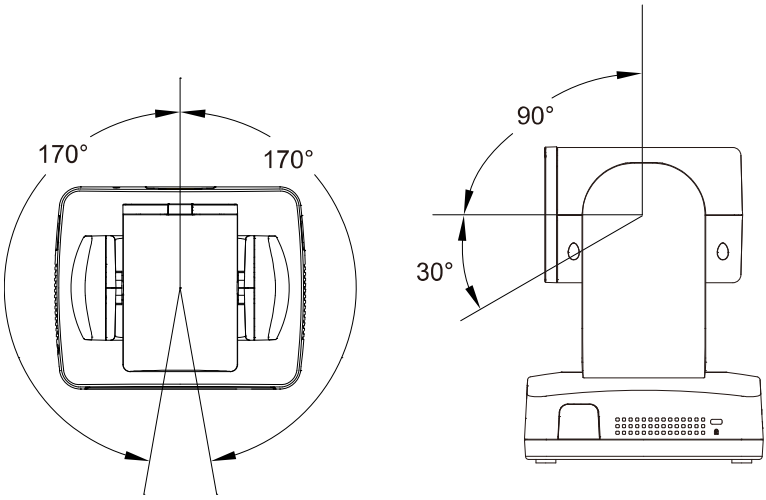
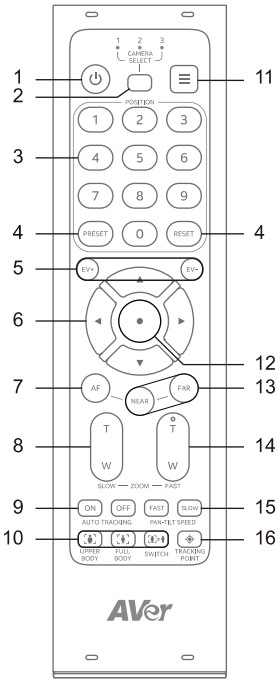
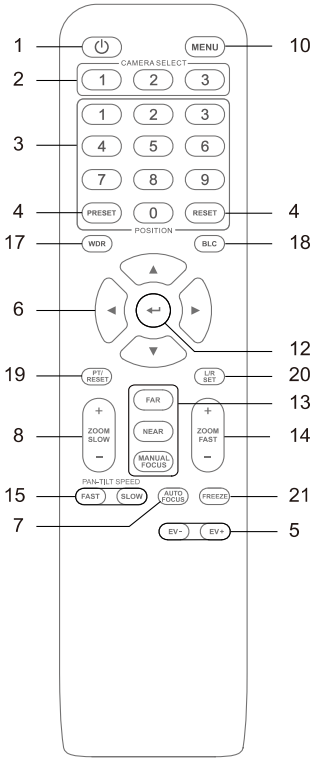
Pan and Tilt Angle



Remote Control

Your device may come with one of the following remote controls.





Name	Function
1. POWER	Enter Standby Mode or wake up.
2. CAMERA SELECT	No selection is required to operate the camera by default. • Both camera and remote control have been set to 1 at the factory. • To assign a number to the camera, go to **System** > **Camera Selector** in the OSD menu.
3. NUMBER BUTTONS	Press **Number button (0-9)** to load defined preset 0-9.
4. PRESET/RESET	• To save a preset, press and hold **PRESET**, then press a **Number button (0-9)**. • To clear a preset, press and hold **RESET**, then press a **Number button (0-9)**.
5. EV +/-	• Press to adjust exposure value. • Press and hold **EV+** to turn on RTMP. • Press and hold **EV-** to turn off RTMP.

6. PAN-TILT CONTROL	Pan and tilt direction control.
7. AF	Turn on Auto Focus.
8. ZOOM SLOW	Zoom in or out slowly.
9. AUTO TRACKING	N/A
10. FRAME PRESENTER	• Upper Body: N/A • Full Body: N/A • Switch: N/A
11. MENU	Open or close the OSD menu during HDMI output.
12. ENTER	• Confirm a selection in the OSD menu. • Press to One Push Focus (auto focus once). • Press and hold to Framing (frame entire group on screen) once. Framing must be turned on in the OSD menu first, go to **Advanced Settings** > **Framing** > **Manual**.
13. NEAR / FAR / MANUAL FOCUS	Press **NEAR** or **FAR** to adjust focus manually. Or press **MANUAL FOCUS**, if available, to turn on Manual Focus first, then press **NEAR** or **FAR** to adjust focus manually.
14. ZOOM FAST	Zoom in or out fast.
15. PAN-TILT SPEED	Adjust pan-tilt speed.
16. TRACKING POINT	N/A
17. WDR	Turn Wide Dynamic Range on or off.
18. BLC	Turn Backlight Compensation on or off.
19. PT RESET	Reset the pan-tilt position to the center.
20. L/R SET	• To invert L/R pan direction, press and hold **L/R SET**, then press **Number button 2**. • To reset L/R pan direction, press and hold **L/R SET**, then press **Number button 1**.
21. FREEZE	Freeze or unfreeze the live view.

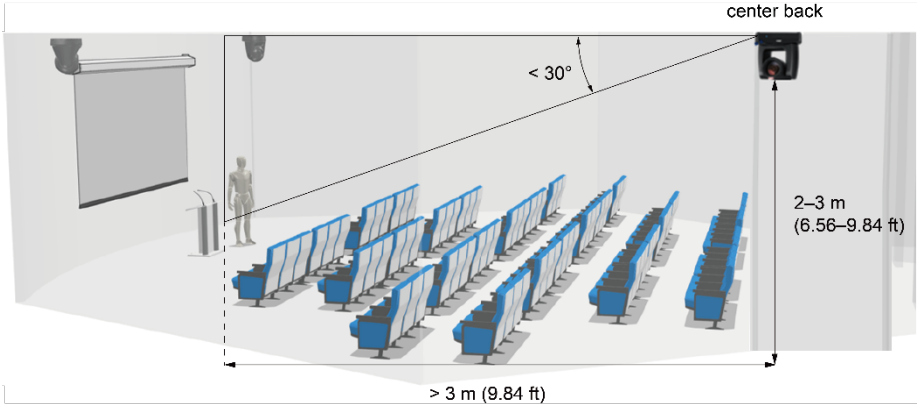
Shortcuts

Press	To
6 six times (666666)	Reset the device to factory default settings.
7 seven times (7777777)	Display the human tracking frame on the HDMI output.
8 eight times (88888888)	Set the network setting to static IP 192.168.1.168.
9 nine times (999999999)	Clear the web interface login. You'll be prompted to change the username and password on your next login.

Installation

Mounting Measurements

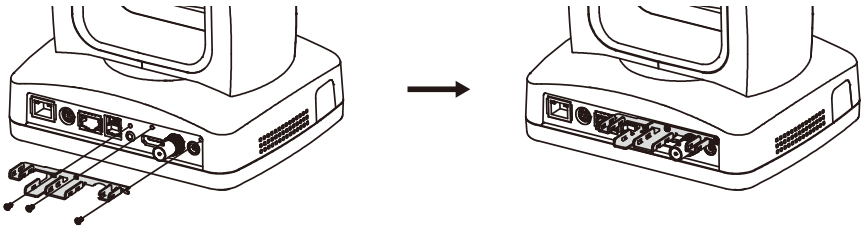
- Motion tracking



Optical zoom	Distance from subject Upper body	Distance from subject Full body	Can be inverted
12X	3-16m	3-28m	Yes
16X	3-30m	4-55m	Yes
21X	3-40m	4-65m	Yes
30X	3-44m	3-76m	Yes

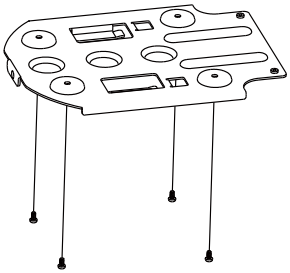
Cable Fixing Plate Installation

1. Secure the cable fixing plate to the camera with the included M2 x 4 mm screws (x3).
2. Connect the cables.
3. Use the cable ties to secure the cables to the cable fixing plate.

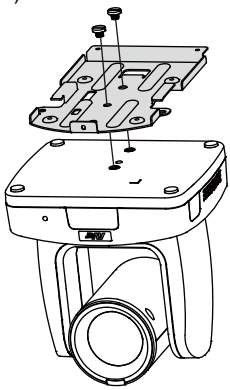


Ceiling Mount Installation

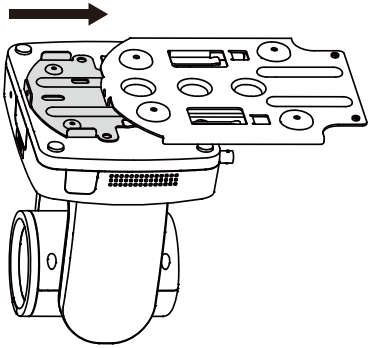
1. Secure the mount bracket on the ceiling.
   Screw: 4 screws, M4 x 10mm (not Included)



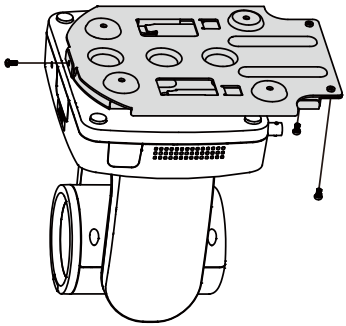
2. Install the mount bracket on the camera.
   Screw: 2 screws, 1/4"-20 L=6.5mm (included)



3. Slide the mount bracket with the camera into the mount bracket which secured on the ceiling. And connect the cables.

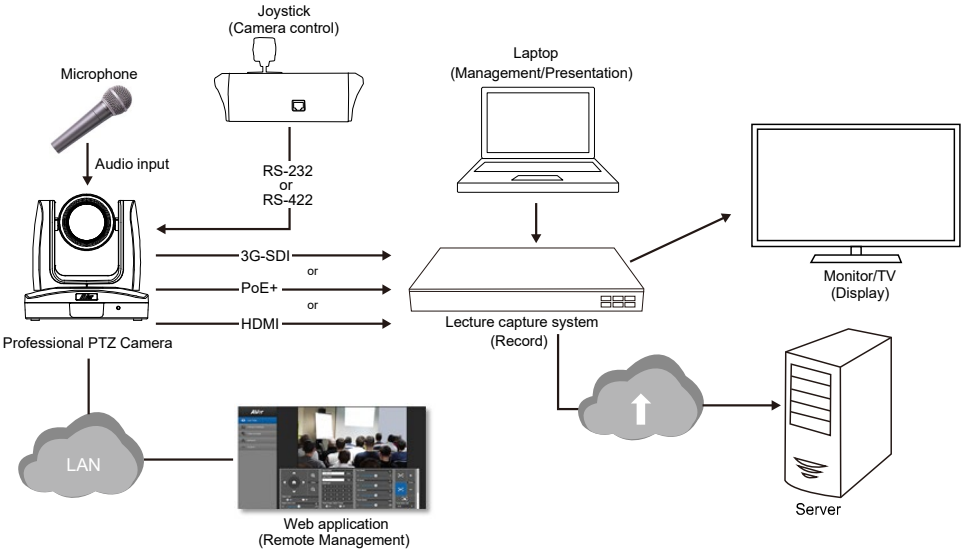


4. Secure the camera with screws.
   Screw: 3 screws, M3 x 6mm (included)



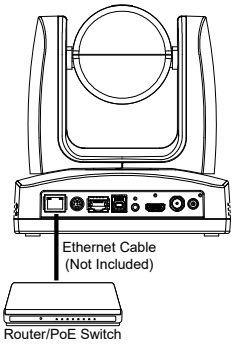
Connection

Device Connection



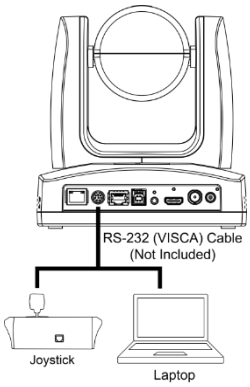
PoE Connection

Connect the camera PoE++ 802.3at port to a port on the Ethernet switch. The switch must provide PoE++ if you are not using a power adapter.



RS-232 Connection

Connect through the RS-232 for camera control.



- **RS-232 mini DIN9 to mini DIN8 Cable Pin Definition**

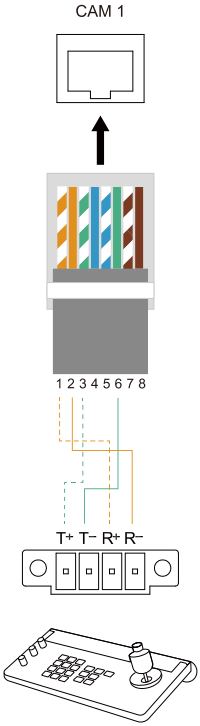
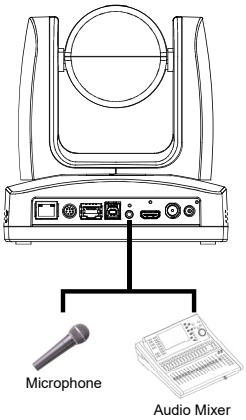
T-568B Cable



Audio Input Connection

Connect to your audio devices to receive audio.
Mic input level: 50 mVrms max.; supplied voltage: 2.5 V.
Line input level: 1 Vrms max.

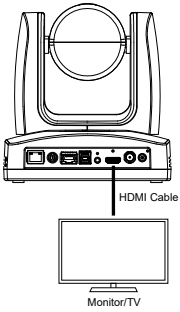


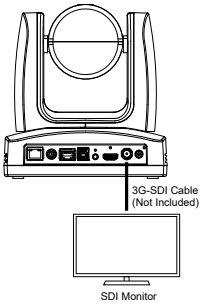
Video Output Connection

Use the included HDMI cable to connect to a monitor or TV.
Or use a 3G-SDI cable to connect to a 3G-SDI display. 3G-SDI is unavailable for model names with H.

Note:

- The camera can stream video via HDMI and 3G-SDI simultaneously.
- The OSD menu will appear by default if you make an HDMI connection before turning on the camera.





Get Started

Power the Device On and Off

The device turns on when you plug it into a power source. The device doesn't have a power button, so you must unplug the power cable to power it off.

Reset the Device

To reset the device to factory default settings, do any of the following:

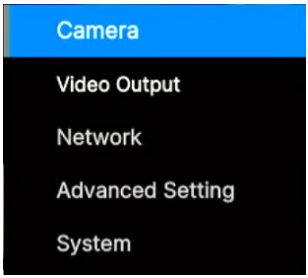
OSD menu: Go to **System** > **Factory Default** > **On**.
Web interface: Go to **System** > **Factory Default** > **Reset to Factory Default**.

Factory Default Settings

IP address	DHCP
Hostname	[Model name]-[last 6 digits of MAC Address] Find the MAC address on the bottom or rear of the device.
Web interface login	None
Theme Mode	All modes reset to **Standard Mode**, except **Zoom** and **Teams**, which will remain unchanged.

Access the OSD Menu

During HDMI output, press the **Menu** button MENU on remote control to open the OSD menu.



Change Your Network Setting

Note: The camera's default network setting is DHCP.

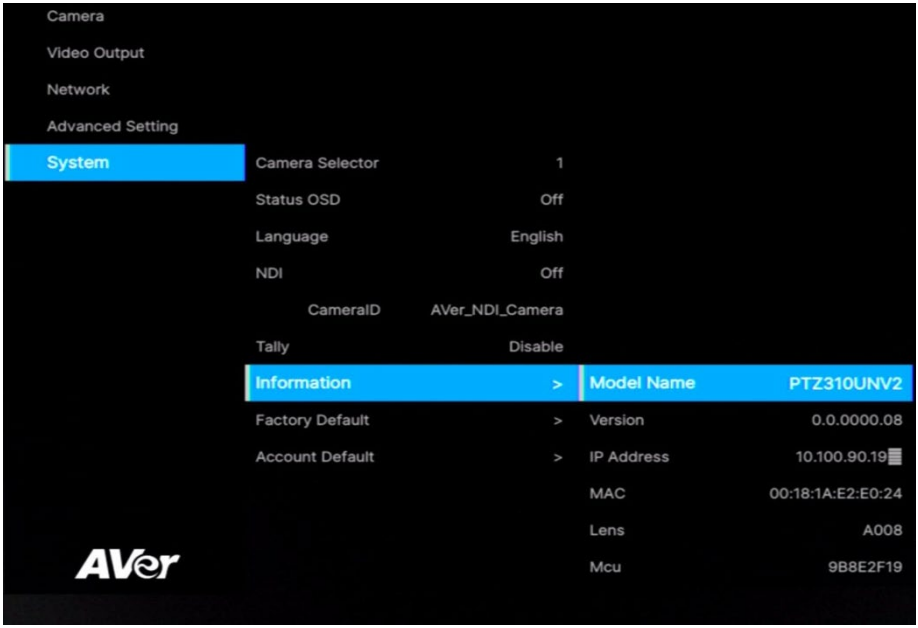
- **Static IP**

1. Press the (MENU) button on remote control to open the OSD menu.
2. Go to **Network** > **DHCP** > **Off**.
3. Then go to **Network** > **Static IP**.
   Select and enter **IP Address**, **Gateway**, **Mask** and **DNS** to configure.

- **DHCP**

1. Press the (MENU) button on remote control to open the OSD menu.
2. Go to **Network** > **DHCP** > **On**.

3. Then go to **System** > **Information** to see your camera's IP address.



Note: If the DHCP server fails to assign an IP address after 30 seconds, the device defaults to 192.168.1.168. Multiple devices will be assigned random IPs within 192.168.1.1 – 192.168.1.254.

To troubleshoot, make sure your DHCP server is running, then disconnect and reconnect the camera LAN cable. Or go to **Network** on the OSD menu > Switch **DHCP** off and on.

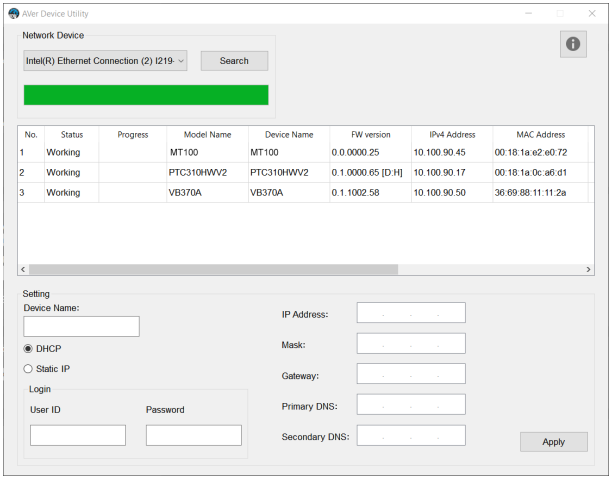
Access the Web Interface

To access the web interface of your device, you can use any of the following software to find its IP address:

- AVer Device Utility
- AVer Enterprise Management

> **Note:** The default network setting is DHCP

AVer Device Utility



To access the web interface:

1. Download AVer Device Utility from AVer Download Center (https://www.aver.com/download-center) and launch the software.

2. Click **Search** to see available devices on the same local area network (LAN).

   > **Note:**
   > - Make sure your device is connected to the internet.
   > - AVer Device Utility and your device must be on the same LAN.

3. Double-click on your device's IP address in the **IPv4 Address** column to open the web interface in your browser.

To change your network to DHCP or static IP:

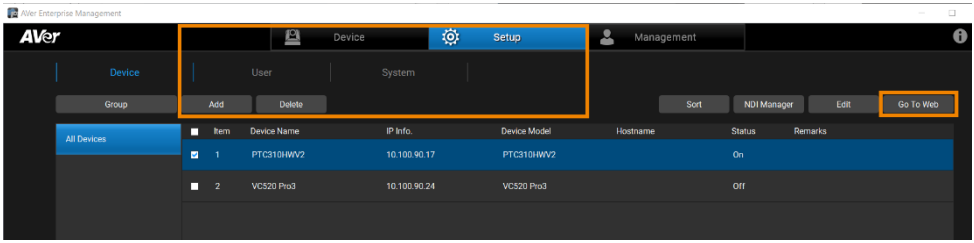
1. Select the checkbox of your device.

2. Enter the username and password in the **Login** field.

3. Select **DHCP** or **Static IP**, then enter your network settings if applicable in the **Settings** section.

4. Click **Apply**.

AVer Enterprise Management



Note: The AVer Enterprise Management's default username and password is **admin**/**admin**.

1. Download AVer Enterprise Management from AVer Download Center (https://www.aver.com/download-center) and launch the software.

2. Log in with the AVer Enterprise Management's default username and password **admin**/**admin**.

3. Go to **Setup** > **Add**, then click **Auto Search** to see available devices on the same local area network (LAN).

4. Click to select your device, enter the changed username and password, then click **Save** to add the device to the device list.

5. Select the checkbox of your device, then click **Go to Web** button to open the web interface in your browser.

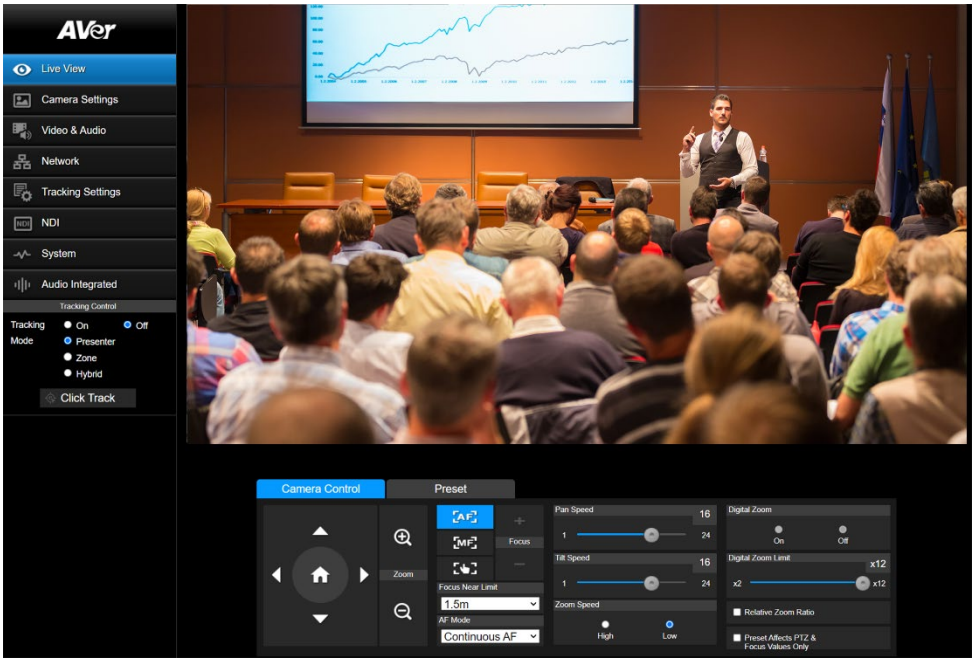
Log in for the First Time

When you log in for the first time, you'll be prompted to change the username and password. The username and password cannot be the same.

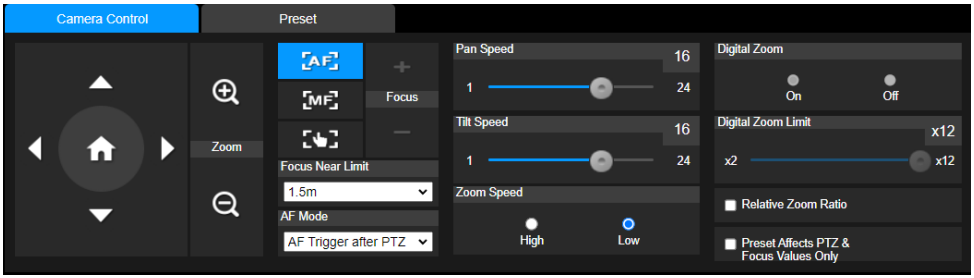
- Username: Use 1-32 characters.
- Password: Use 8-32 characters and a combination of uppercase letters, lowercase letters, and, numbers. Symbols (!$%'()*+,-./<=>?@[\]^_{}~) are optional.

Web Interface

Live View



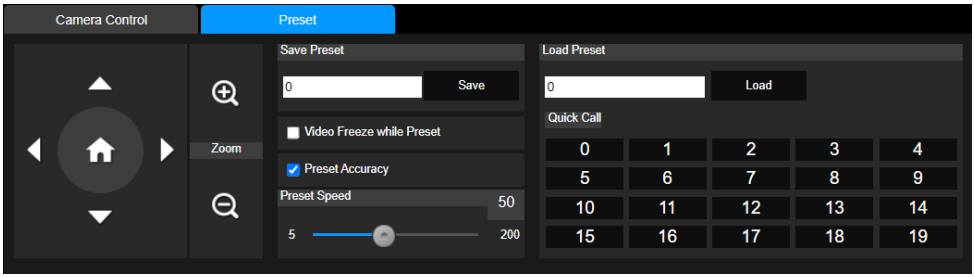
Camera Control



Item	Description
Pan, Tilt, Zoom Controls	Use pan, tilt, and zoom controls to position the camera.
Home	Reset the pan-tilt position to the center.
Auto Focus AF	Focus automatically with an autofocus mode:

AF Mode	• AF Trigger after PTZ: Automatically focus after each pan, tilt or zoom. • Continuous AF: Automatically focus continuously.
Manual Focus	Focus manually with + - buttons.
One Push Focus	Focus automatically once.
Focus Near Limit	Select the nearest focus limit.
Pan Speed	Adjust pan, tilt and zoom speed.
Tilt Speed	
Zoom Speed	
Digital Zoom	Turn digital zoom on or off.
Digital Zoom Limit	Select the digital zoom limit.
Relative Zoom Ratio	Select to automatically adjust pan and tilt speeds based on the zoom ratio.
Preset Affects PTZ & Focus Values Only	A preset typically includes pan, tilt, zoom, focus, and 3A (autofocus, auto exposure, auto white balance) values. Select to save only pan, tilt, zoom and focus values for presets.

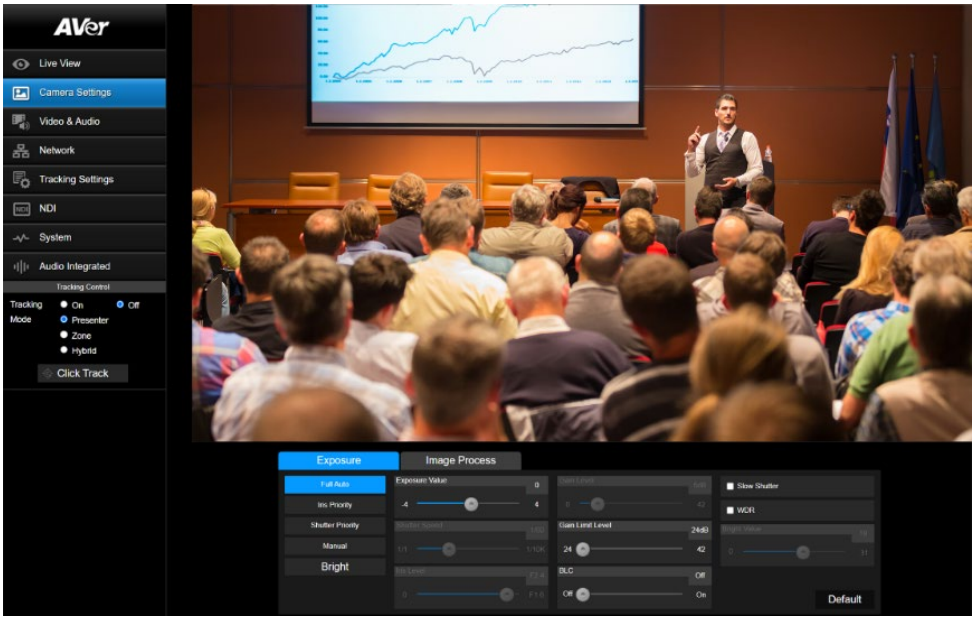
Preset



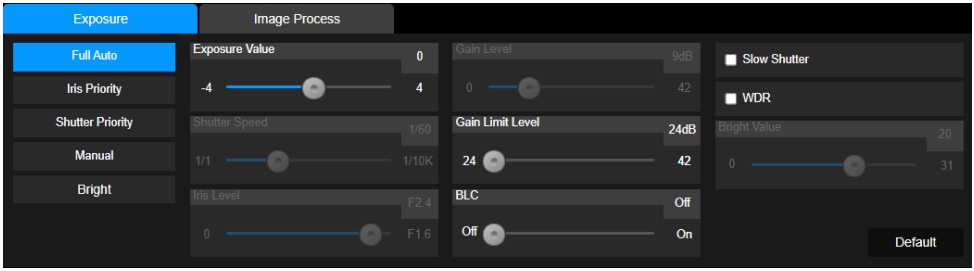
Item	Description
Save Preset	1. Position the camera using pan, tilt and zoom controls. 2. Enter a preset number (0–255) in the **Save Preset** field and click **Save**.
Load Preset	1. Enter a preset number (0–255) in the **Load Preset** field and click **Load**. 2. Or click a preset number (0–19) in the **Quick Call** section.
Video Freeze while Preset	Select to display only the live view from presets. The live view from the moving path will not be displayed.
Preset Accuracy	Select to improve the accuracy of moving to presets.
Preset Speed	Adjust the camera speed when moving to presets.
Edit Scenes	To customize camera functions for preset 0–9: 1. Click **Edit Scenes**.

	2. Select **Scenes 0**–**9** from the **Scenes List** to add up to 10 CGI commands. 3. Select a scene from the **Set Scenes** drop-down list for each preset.

Camera Settings



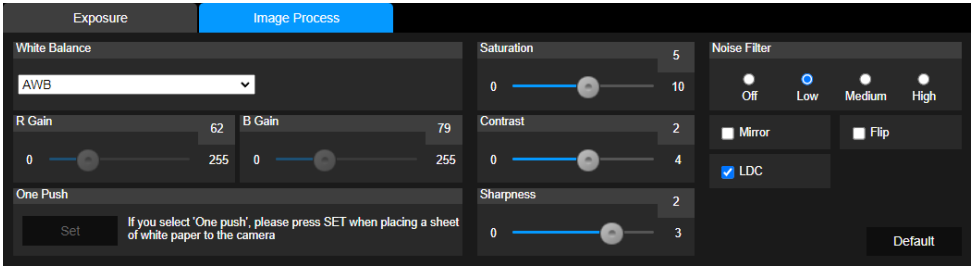
Exposure



Item	Description
Exposure Mode	Select an exposure mode to adjust image brightness: • Full Auto: Automatically adjusts shutter speed (ISO), iris (aperture), and gain for optimal brightness in most environments. • Iris Priority: You set the iris, and the camera adjusts shutter speed and gain. Useful for controlling depth of field.

	• Shutter Priority: You set the shutter speed, and the camera adjusts iris and gain. Ideal for capturing motion with minimal blur. • Manual: Manually adjust shutter speed, iris, and gain. • Bright: Drag the bright value slider to manually increase brightness by adjusting iris and gain.
Exposure Value	Fine-tunes overall image brightness.
Gain Limit Level	Sets the maximum gain the camera is allowed to use automatically. Helps balance between brightness and image noise.
BLC (Backlight Compensation)	Brightens subjects in front of bright backgrounds (like windows).
Slow Shutter	Makes the image brighter in low light by slowing down shutter speed. May cause motion blur.
WDR (Wide Dynamic Range)	Enhances visibility in scenes with both very bright and very dark areas so details aren't lost in shadows or highlights.
Default	Reset Exposure to factory default settings.

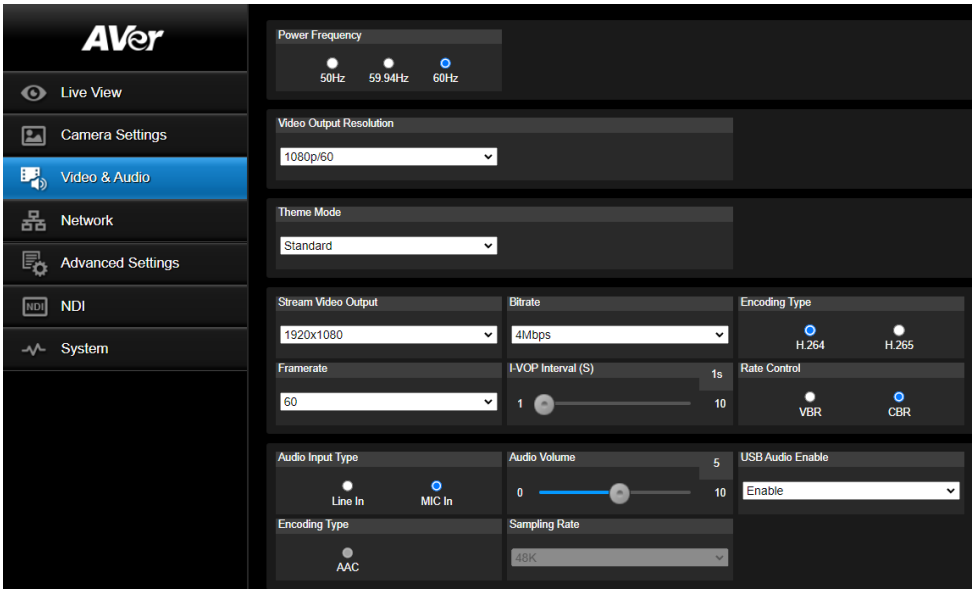
Image Process



Item	Description
White Balance	Select a white balance mode to match the lighting conditions and ensure accurate color: • AWB (Auto White Balance): Automatically adjusts white balance based on the current lighting. Best for stable indoor lighting. • ATW (Auto Tracking White Balance): Continuously adapts to changing lighting conditions. Ideal for dynamic or mixed lighting environments. • Indoor: Fixes red and blue gain for a color temperature of 3200 K. • Outdoor: Fixes red and blue gain for a color temperature of 5800 K.

	● One Push: Calibrates white balance using a white reference. Place a white sheet of paper in front of the lens and click **Set** to capture accurate color balance based on the current lighting. ● Manual: Manually adjust the red and blue gain.
Saturation	Adjust saturation, contrast and sharpness.
Contrast	
Sharpness	
Noise Filter	Select a noise filtering level.
Mirror	Flip the image horizontally.
Flip	Flip the image vertically.
LDC (30X optical zoom models only)	Correct lens distortion.
Default	Reset Image Process to factory default settings.

Video & Audio



Item	Description
Power Frequency	Select **50Hz**, **59.94Hz** or **60Hz** based on your country and region.
Video Output Resolution	Select a resolution to display on your video output device.
Theme Mode	Select a video mode based on the output interface you want to use. **Note:** ● For details on resolution, please refer to <Output Interface Table> 。 ● Zoom Mode: USB audio is disabled. ● Teams Mode: USB audio is disabled. Video is limited to USB output only.  ● When Teams Mode is selected, the camera Live View on the web interface is automatically disabled and cannot be displayed. To view the Live View, switch to another mode.

Stream Video Output	Select a stream resolution on live view from the drop-down list.
Bitrate	Select a bitrate from the drop-down list.
Encoding Type (video)	Select **H.264** or **H.265** to encode streaming video.
Framerate	Select a framerate for live stream – **1**, **5**, **15**, **20** or **30** for power frequency **59.94Hz** or **60Hz**; **1**, **5**, **15**, **20** or **25** for power frequency **50Hz**.
I-VOP Interval (S)	Sets how often a keyframe (or I-frame) is inserted in the video stream. ● A keyframe is a full image frame used as a reference point in video. Shorter intervals improve video quality, but increase file size.
GOP Value (Group of Pictures Value)	Sets the number of frames between two keyframes. This controls how often keyframes are inserted in the video stream. ● When I-VOP Interval = 0, keyframes are inserted based on the GOP Value. ● When I-VOP Interval > 0, keyframes are inserted based on the set time interval, and GOP Value is ignored.
Compatibility Encoding Mode	When enabled, the camera uses Multi-Slice encoding to improve compatibility and performance when playing UHD video on certain devices. **Note:** We recommend turning this on only if required for specific decoder compatibility. Otherwise, keep the default setting (Off).
Rate Control	Select **VBR** or **CBR**.
Audio Input Type	Select to input audio by **Line in** or **Mic in**.
Audio Volume	Drag the slider to set the volume from **0** to **10**.
USB Audio Enable	Select from the drop-down list to turn on or off the setting.
Encoding Type (audio)	AAC.
Sampling Rate	48K

Output Interface Table

Mode	Video Quality	Output Interface	Comment
Standard	Standard	HDMI, SDI, IP, USB, NDI HX2	
Zoom	Zoom certified	HDMI, SDI, IP, USB, NDI HX2	The camera rotates towards the I/O ports (preset 20) when not streaming over USB. When both USB (UVC) and RTSP streams are active, Sleep to Preset is triggered by USB (UVC) disconnection; when USB (UVC) is not in use, it is triggered by RTSP stream disconnection.

			To change the sleep mode position, go to **System** > **Sleep to Preset** on the web interface.
Teams	Teams certified	USB	The camera rotates towards the I/O ports (preset 20) when not streaming over USB. To change the sleep mode position, go to **System** > **Sleep to Preset** on the web interface.
NDI	Standard	HDMI, SDI, IP, NDI HX3	
Dante	Standard	Dante	Requires a Dante license. To purchase, please visit the Dante website (https://www.getdante.com/).
Portrait (beta)	Standard	HDMI, SDI, IP, USB, NDI HX2	

Difference between NDI HX2 (Standard Mode) and NDI HX3 (NDI Mode)?

- **NDI HX3** delivers higher quality, lower latency video and audio over HX2. To be certified, HX3 devices need to support low latency, constant bitrate (CBR) encoding, and meet stricter demands such as keyframe response times and a fixed GOP size.
- **NDI HX2** devices follow a more relaxed set of requirements. These devices may have slower latency or keyframe or a larger GOP.

Note: For detailed technical requirements, please refer to the NDI documentation (https://docs.ndi.video/all/developing-with-ndi/ndi-certified/certification-guidelines/technical-requirements).

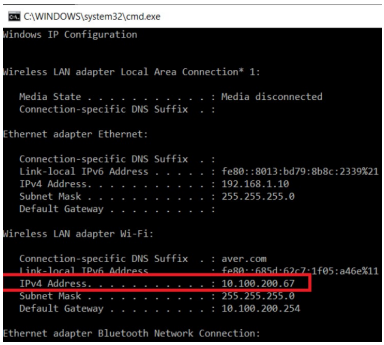
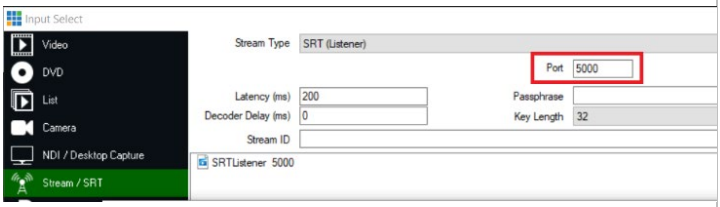
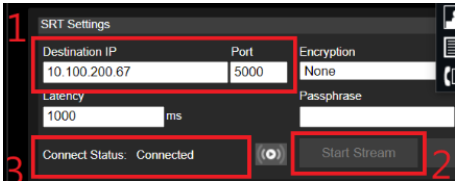
Item	Description
DHCP	Set up the network to DHCP or Static IP. ● **DHCP**: Select **On** to assign the related IP settings with the camera automatically. Click **Confirm** to save the settings. ● **Static IP**: Select **Off** to manually enter the **IP Address**, **Netmask**, **Gateway** and **DNS**. Click **Confirm** to save the settings.
Hostname	Enter a hostname that is displayed on devices such as an IP router. ● The default hostname is [Model name]-[last 6 digits of MAC Address].
NTP	Turn Network Time Protocol (NTP) on or off.
RTMP Settings	Stream camera live video to a video platform such as YouTube. 1. Enter the **Server URL** and **Stream Key** of the platform. Please refer to the instruction of the platform you use to obtain the server URL and stream key. 2. Click **Start Stream** to start streaming, **Stop** to stop streaming.
RTSP Security	Protect your video stream on media players such as VLC, PotPlayer and QuickTime by ensuring that only authorized users can access it. ● When **Security** is turned off: 1. Enter your camera's RTSP URL into the media player. 2. RTSP URL: rtsp://[camera IP address]/live_st1 Example: rtsp://192.168.1.100/live_st1 ● When **Security** is turned on: 1. Enter your camera's RTSP URL, username and password into the media player. 2. RTSP URL: rtsp://[username:password]@[camera IP address]/live_st1 Example: rtsp://1:1@192.168.1.100/live_st1 3. Username and password: camera's web interface login.
HLS Settings	Configure HTTP Live Streaming (HLS) settings to provide adaptive bitrate streaming, which ensures smooth playback and minimizes buffering. 1. Enter the stream URL obtained from the streaming service or server. 2. Click **Start Stream** to start streaming, **Stop** to stop streaming.
SRT Settings	● vMix 1. Make sure the vMix workstation and your camera are on same network. Copy the workstation's IP address.



2. Go to **Stream** tab > select **SRT (Listener)** from the **Stream Type** drop-down list. Copy the **Port** value.



3. Paste the IP address and Port value into **SRT Settings** fields and click **Start Stream**. **Connect Status** will change to **Connected**.



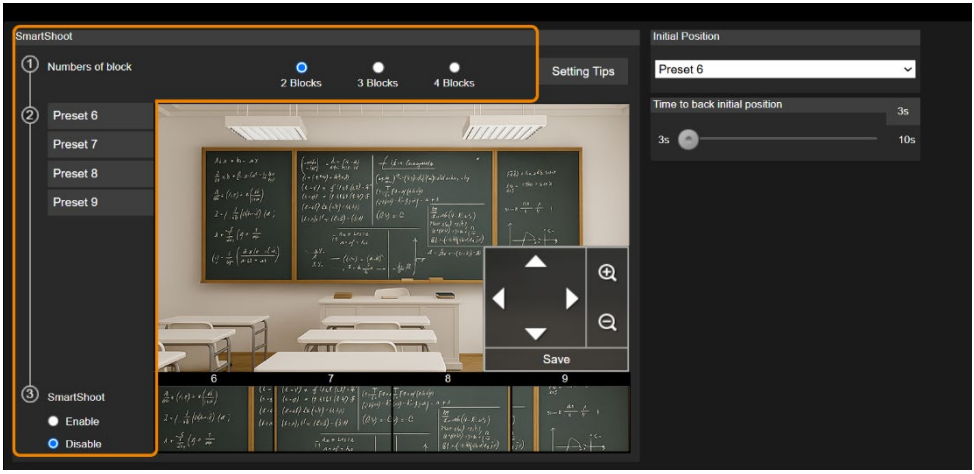
- OBS (Open Broadcaster Software)
  1. Make sure the OBS workstation and your camera are on same network. Copy the workstation's IP address.

  2. Open OBS. Add a scene and a source.
  3. Enter "srt://[Workstation IP]:[port]?mode=listener" in the **Input** field.
     Example: srt://10.100.105.127:8889?mode=listener

	 4. If there is no image, right-click on the source > **Transform** > **Fit to screen** to re-scale image.
HTTPS	Enable HTTPS to establish a secure connection between your browser and your camera. To enable HTTPS access on your camera: 1. Obtain a SSL certificate for encryption and decryption in base-64 encoded format and use a private key in PKCS#8 format (unencrypted). 2. Package the required certificate content into PEM format. The SSL certificate uploaded to the camera must be in PEM format. 3. Click **Choose File** to select the certificate file, and then click **Upload**. 4. Turn on HTTPS.
SSHD	Turn remote debugging from AVer on or off.
Visca Port Mode	Select a VISCA port mode, then enter the **Visca Port Number**.
802.1x Enable	Turn 802.1x Enable on or off.
Eap Method	When **802.1x Enable** is turned on, select an Eap method.
Eap Setting	Based on your Eap method, complete the authentication and click **Confirm**.
FreeD	Turn the FreeD protocol on to send camera positioning data to a virtual reality production system. When FreeD is turned on, enter the following information: ● Your **Camera ID.** ● The **IP Address** and **Port** of the device receiving your camera's positioning data. ● Manually enter pan and tilt backlash amount to ensure accurate aiming.

Advanced Settings

SmartShoot



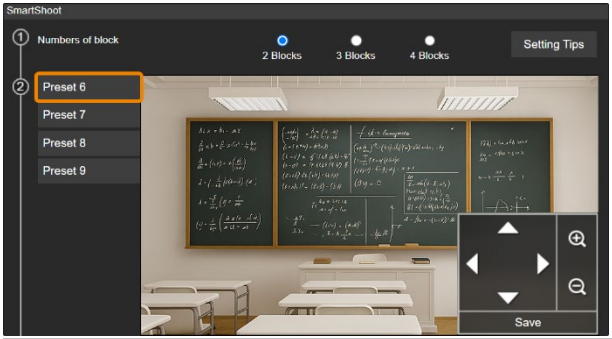
SmartShoot uses up to 4 presets to frame and follow the presenter on screen.
When no one is in the presets, the camera returns to the Initial Position (Preset 6 or selected preset).

Note: SmartShoot detects human heads or silhouettes entering the presets. Beside the presenter, make sure there are no other human heads or silhouettes on a poster in the presets to avoid interference.

To set up SmartShoot:

1. Go to **Advanced Settings** > select the **Number of blocks** (presets) you want to track.

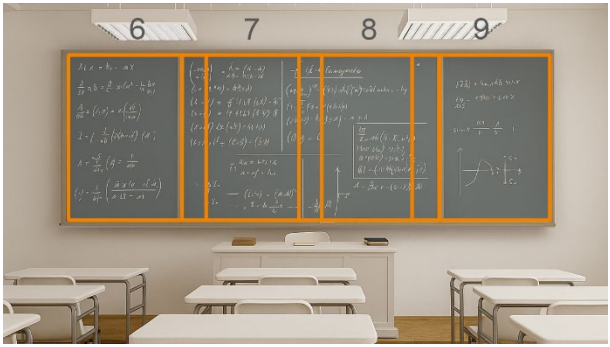
2. Select the preset you want to save. Presets 6–9 are available.



2 Blocks	3 Blocks	4 Blocks

Preset 6、7	Preset 6、7、8	Preset 6、7、8、9

3. Use pan, tilt and zoom controls to position your camera and click **Save** to save that position. A thumbnail will appear in the preview. Repeat these steps for all presets.



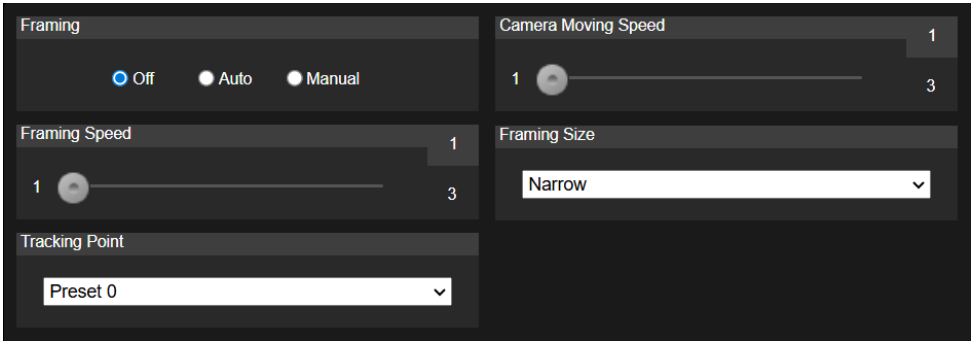
Note: Define overlapping presets for a smooth transition. When the presenter exits the previous preset, the camera will follow and move to the next preset.

4. Configure additional settings:

Item	Description
Initial Position	If no one is in the presets, the camera returns to the Initial Position (Preset 6 or selected preset). 
Time to go back to initial position	Drag the slider to set a delay time before the camera returns to the Initial Position.

5. Turn on SmartShoot by selecting **Enable**.
   Or open the OSD menu with the remote control, go to **Advanced Settings** > **SmartShoot** > **On**.

Framing



Auto Framing frames entire group on screen automatically while Manual Framing frames entire group on screen once.

When no one is on screen, the camera returns to the pan-tilt center (default) or the Tracking Point (optional, selected preset).

To set up Framing:

1. Go to **Advanced Settings**.
2. Configure additional settings:

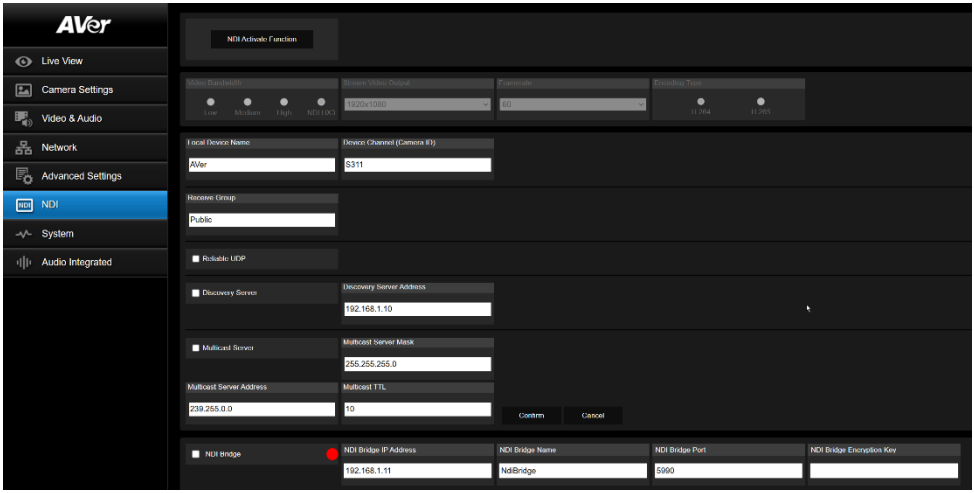
Item	Description
Framing Speed	The camera auto frames every time a subject enters or leaves the screen. If Auto Framing feels too frequent, drag the slider to adjust the trigger speed: **1 = Slow**, **3 = Fast**.
Tracking Point	When no one is on screen, the camera returns to the pan-tilt center (default) or the Tracking Point (optional, selected preset). To select a Tracking Point, make sure you have defined the required preset. 
Camera Moving Speed	Drag the slider to adjust pan and tilt speed: **1 = Slow**, **3 = Fast**.

Framing Size	Select a framing size to include or remove excess space on either side of the subject.

3. Turn on Framing by selecting **Auto** or **Manual**.

Note: After Manual Framing once, Framing remains turned on but inactive. To Manual Framing again, press and hold **Enter** on the remote control.

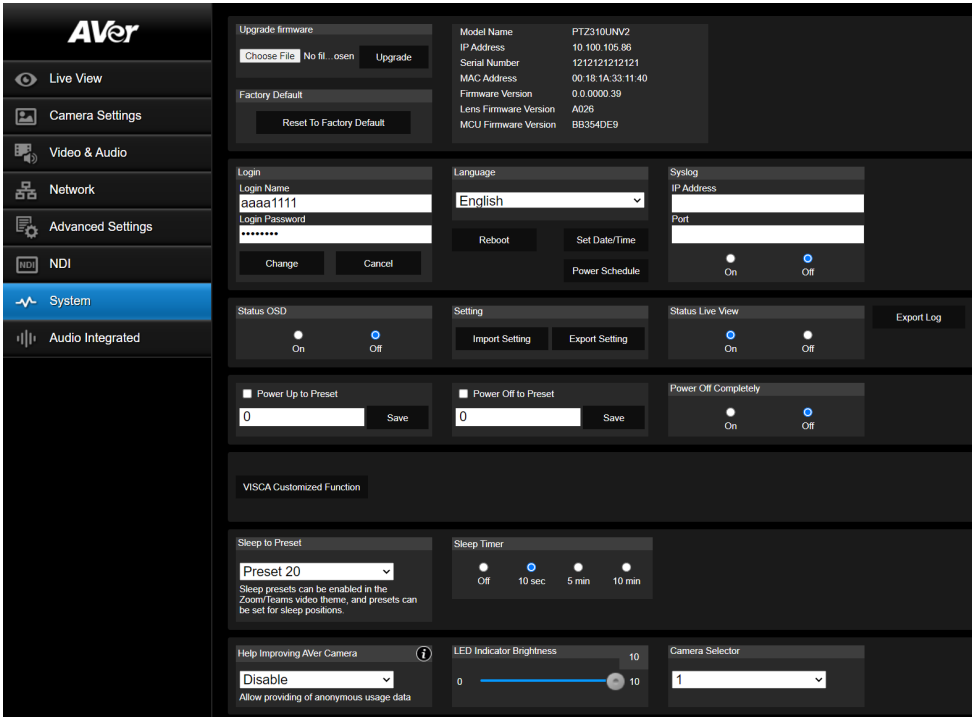
NDI



Item	Description
Built-in NDI	Upgrade to the latest firmware to enable NDI at no additional cost.
Video Bandwidth	Select a bandwidth. ● In NDI HX3 Mode, framerate adjustment is restricted as per certification guidelines. It is possible with other bandwidths (Low, Medium, High). ● The main difference between High and NDI HX3 Modes lies in the compression settings. Parameter / High / HX3 Bitrate / ~64 Mbps / ~ 90 Mbps GOP Value / 1 second (adjustable when I-VOP Interval = 0) / 20 frames (non-adjustable)
Stream Video Output	Choose a streaming output resolution for the live view. 4K (2160p) is available for model names with U only.
Framerate	Choose a framerate.
Encoding Type	Select **H.264** or **H.265**.
Local Device Name	Enter a name that identifies your camera group on the NDI software. ● The default is AVer.

Device Channel (Camera ID)	Enter a name that identifies your camera on the NDI software. ● The default is your model name. ● A name must have no more than 10 characters. Use number, upper and lower case letter, or special character (! @ % ^ , . / : + ? [ ] { } - _ ~).
Receive Group	Enter a name for a receive group. ● All devices in the receive group receive the same NDI streams. ● The receive group should remain **public**. If this is changed, you will need to join the group through NDI® Access Manager.
Reliable UDP	Select the checkbox to enable Reliable User Datagram Protocol (RUDP).
Discovery Server	Select the checkbox to enable discovery server to allow devices to discover and connect to each other on a network automatically.
Discovery Server Address	Enter the IP address of a server running a discovery server application.
Multicast Server	Select the checkbox to enable multicast server to allow efficient distribution of NDI streams to multiple receivers without overwhelming the network.
Multicast Server Mask	Enter the network mask to specify the range of IP addresses that are eligible to receive NDI streams.
Multicast Server Address	Enter the IP address of a group of recipients that receive NDI streams from a multicast server.
Multicast TTL	Enter a multicast time to live (TTL) value between 1-255 to control the distance multicast packets can travel.
NDI Bridge	Connects and shares NDI streams between remote NDI-enabled devices and infrastructures across a wide area networks (WAN). Requires the NDI Tools from NewTek (https://ndi.video/tools/).

System

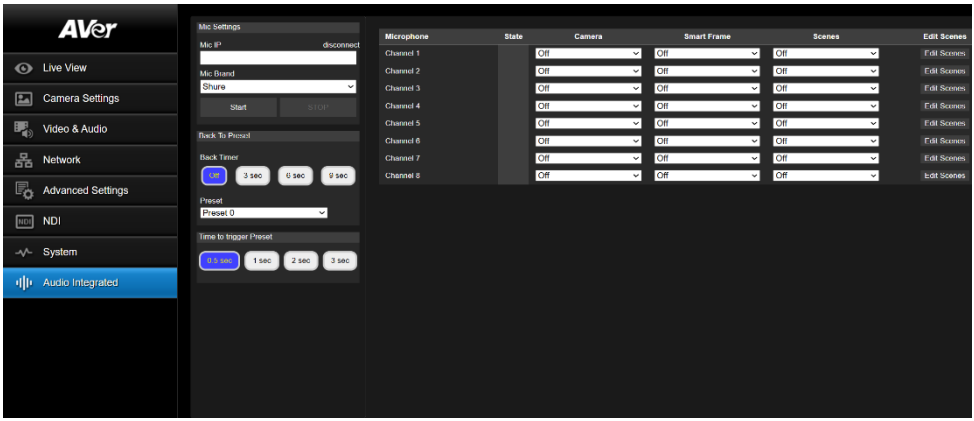


Item	Description
Upgrade Firmware	To upgrade the firmware: 1. Download the latest firmware from AVer Download Center (https://www.aver.com/download-center). 2. On the web interface, go to **System** > **Upgrade firmware**. 3. Click **Browse** to select the firmware. 4. Click **Upgrade**. 5. Refresh the browser after the upgrade is complete. **Note:** Keep your camera connected to a power source during firmware upgrade. Network connection will be lost during the process and camera will reboot automatically after upgrading.
Factory Default	Reset the camera to factory default settings.
Login	Change the web interface login.
Language	Change the web interface language.
Reboot	Restart your camera.
Set Date/Time	Set the camera date and time.

Power Schedule	Schedule specific times for the camera to reboot or shut down.
Syslog	Turn on to receive technical supports. Enter the **IP Address** and **Port** of the receiving device for debug and problem analysis.
Status OSD	Turn on to display preset, zoom ratio, SmartShoot and Framing captions on HDMI output.
Setting	Export or import your camera settings
Status Live View	Turn the camera live view on or off.
Export Log	Export system log.
Power Up to Preset	Move the camera to the defined preset after powering on. To enable: 1. Make sure the preset has been defined. 2. Select **Power Up to Preset** > enter a preset number > click **Save**.
Power Off to Preset	Move the camera to the defined preset before powering off. To enable: 1. Make sure the preset has been defined. 2. Select **Power Off to Preset** > enter a preset number > click **Save**.
VISCA Customized Function	Set VISCA customized functions and click **OK**.
Sleep to Preset	Set up to move the camera to a preset after a delay time, when you are not streaming video on Zoom/Teams over USB for enhanced privacy. When using Zoom, enable Ethernet Sleep to Preset to trigger the Sleep to Preset function if USB (UVC) is disconnected when both USB (UVC) and RTSP streams are active. When USB (UVC) is not connected, RTSP stream disconnection will also trigger this function. ● To enable: 1. Make sure you have defined the selected preset. 2. Go to **Video & Audio** > **Theme Mode** > select **Zoom** or **Teams**. 3. Go to **Systems** > **Sleep to Preset** > select a preset or use the default (preset 20, towards I/O ports). 4. Go to **Systems** > **Sleep Timer** > select a delay time. ● To disable, select **Off** from the **Sleep to Preset** drop-down list.
Sleep Timer	
Help Improving AVer Camera	Opt-in or opt-out of providing anonymous usage data.

LED Indicator Brightness	Drag the slider to adjust the brightness.
Camera Selector	Assign a camera select button 1-3 on the remote control to the camera. ● Both camera and remote control have been set to 1 at the factory.
P/T Reset	Reset the pan-tilt position to the center.
Panning Direction	Invert or reset the pan direction.

Audio Integrated



Supported Microphones

Shure® MXA910 Ceiling Array Microphone

Shure® MXA920-S / MXA920-R Ceiling Array Microphone

Item	Description
Mic Settings	Enter the microphone IP t to connect. Click **Start** to connect and **Stop** to disconnect.
Back to Preset	Select a delay time before the camera moves to the selected preset.
Time to trigger Preset	Select a delay time before the camera moves to the preset when the microphone detects sound.
Mic Manager	● Pair microphone channels with presets. ● Turn tracking on or off for each channel. ● Customize camera functions and add up to 10 CGI commands for each channel.

Appendix

VISCA over IP Settings

PORT

Internet protocol	IPv4
Transport protocol	UDP
Port address	52381

FORMAT

	byte 0	byte 1	byte 2	byte 3	byte 4	byte 5	byte 6	byte 7	byte8 ~~~ byte23
func	Payload type		Payload length		Sequence number				Payload (1 to 16 bytes)
data	Value1	Value2	1~16 (0x0001~0x0010)		0X00000000 ~ 0XFFFFFFFF				VISCA Packet (see page VISCA)

Payload type

Name	Value1	Value2	Description
VISCA command	0x01	0x00	Stores the VISCA command.
VISCA inquiry	0x01	0x10	Stores the VISCA inquiry.
VISCA reply	0x01	0x11	Stores the reply for the VISCA command or VISCA inquiry

For VISCA over IP command strings, **8x** represents a command from the controller, with x as the socket number—typically 1 (**x = 1 → 81**).

Command Set	Command	Command Packet	Comments
Pan-tilt Drive	Left	8x 01 06 01 VV WW 01 03 FF Example : 01 00 00 09 00 00 00 01 81 01 06 01 07 07 01 03 FF	VV: Pan speed setting 0x01 (low speed) to 0x18 (high speed) WW: Tilt speed setting 0x01 (low speed) to 0x18 (high speed)

Absolute Position (Zoom)	/cgi-bin?Set=ptz_z,3,val	val: {min: 2048, mid: 14224, max: 28448}			Follows CGI preset speed
CGI List for Various Settings					
exposure value	/cgi-bin?Set=	img_expo_expo,3,N&(random)	value	1 ~ 9	N : value
saturation	/cgi-bin?Set=	img_saturation,3,N&(random)	value	0 ~ 10	N : value
contrast	/cgi-bin?Set=	img_contrast,3,N&(random)	value	0 ~ 4	N : value
Reboot	GET(Basic Authentication)	/cgi-bin?OnePush=!			
Factory Reset	GET(Basic Authentication)	/cgi-bin?OnePush=d			
RTMP Start streamming	/cgi-bin?Set=	vdo_rtmp_enable,3,1			
RTMP Stop streamming	/cgi-bin?Set=	vdo_rtmp_enable,3,0			
Save RTMP server URL		/cgi-bin?SaveRtmpUrl=		value empty for clearing up the field	
Save RTMP stream Key		/cgi-bin?SaveRtmpKey=		value empty for clearing up the field	
Inquiry for RTMP status		/cgi-bin?Get=vdo_rtmp_status		Streaming: vdo_rtmp_status=2 Stopped: vdo_rtmp_status=0	
Get RTMP server URL		/cgi-bin?GetRtmpUrl			
Get RTMP stream key		/cgi-bin?GetRtmpKey			
USB status	GET(Basic Authentication)	/cgi-bin?Get=usb_status_inquire,3			
	- Reply	"usb_status_inquire,3=X\r\n"	X: 0(plug out), 1(plug in)		
UVC status	GET(Basic Authentication)	/cgi-bin?Get=uvc_status_inquire,3			
	- Reply	"uvc_status_inquire,3=X\r\n"	X: 0(stream off), 1(stream on)		

Status get (Model name & mac & FW_VER)		/cgi-bin?SetString=sys_name&net_mac&sys_fw_version&_=1635216271678		http://10.100.105.110/cgi-bin?GetString=sys_name&net_mac&sys_fw_version&_=1635216271678	
Serial No. get		/cgi-bin?GetSerialNumber&_=1635216271680		http://10.100.105.110/cgi-bin?GetSerialNumber&_=1635216271680	
script (Using cURL to update firmware)	curl.exe -X POST --user NAME:PASSWORD -F file1=@./ISP_FILE "http://IP_ADDRESS/system/"			Please download curl (curl for Windows), this is a command line tool for network transferring. Put curl.exe and ISP file in the same folder. and then execute the script to upgrade camera. For example, ISP file is 0.0.0.0000.29.dat , IP address is 10.100.105.109 and username:password is 1:1 , you can enter this script to execute ISP process. curl.exe -X POST --user 1:1 -F file1=@./0.0.0000.29.dat "http://10.100.105.109/system/"
